Service Plans – Release 1

As at 14 July 2024

CITY OF GOLDCOAST.™

Service planning overview

Service Planning is integral to our Integrated Planning Framework and future state operating model and is a key element of our Governance Framework, How we deliver.

A consistent approach to strategy, service and business planning (and reporting) will be achieved over several years to ensure we deliver on our strategy and service outcomes. The service plans contained within this catalogue form part of Release 1. Development of Release 2 Service Plans will commence on 1 January 2025.

SERVICE PLAN OVERVIEW

Service plans are a strategic document that informs how services are delivered, what they will cost and how performance will be measured and monitored. They provide a consistent approach in describing the overall objective, activities, service level measures and KPIs that a service contributes to delivering on Council Plan outcomes.

Benefits in developing service plans include:

- ✓ **Efficient resource allocation** – ability to strategically allocate resources and budgets to deliver on community needs and expectations
- ✓ **Improved service delivery** – linking service planning to the Council Plan ensures that the City continues to deliver the right mix of services and provide value for money
- ✓ **Community engagement and satisfaction** – provides an opportunity to engage with the community to identify their priorities and design services that meet current and future needs
- ✓ **Enhanced accountability and transparency** – establishes clear service objectives to enable services to be measured and progress toward achieving Council Plan outcomes to be tracked
- ✓ **Financial sustainability** – enables understanding of revenue needed to make services financially sustainable and adjust service levels to manage costs and community expectations

OUR GOVERNANCE FRAMEWORK

Our governance framework will simplify and streamline how we plan, how we operate, how we deliver and how we review to ensure we deliver on our mission to be a high-performing, customer focussed organisation which delivers value for money services to our community.

DRAFT

Service Lifecycle Management Framework

A service lifecycle management framework was created to establish a consistent approach of how services are designed, planned, reported on and continuously improved and transformed

SERVICE LIFECYCLE MANAGEMENT FRAMEWORK

STEP	Design[1]	Plan	Delivery	Report and adjust
	Includes defining the service specifications, key processes, technology requirements and resources needed to deliver the service.	Service plans outline how services are delivered, what they will cost (inputs), what they will deliver (outputs) and how performance will be measured and monitored.	Services are delivered according to defined service levels and performance metrics (outlined in service plans).	The service is monitored and delivery is adjusted through a continuous improvement culture. Key triggers (to be defined) will result in a Service Review (formerly known as Commissioning & Contestability) or an update to the Service Plan.
ACTION	Service design to be developed as required.	Service Plans will be updated annually in line with fixed delivery budget allocation.	Service levels and Service KPIs will be reported on quarterly. Project reporting will be in line with P3M.	ELT will review progress of strategic outcomes quarterly, and if required, endorse the development of a service blueprint, a major revision to a Service Plan or a Service Review.

OTHER ACTIVITIES

Service Review
Detailed review of a service and associated activities, including how the service is delivered

Service Plan update
Based on performance or changes to service delivery

Update to Service Plan trigger
E.g. adjustments to specific service level measures

Service Review Trigger
A Service Review may be triggered by service performance, changes to legislation or other factors – a Service Review is a deep dive into the service to improve the City's value for money

DRAFT

Key Insights

The key insights have been identified through the service plan development process to inform ongoing maturity of service planning in the City and future ELT discussion

AREA OF MATURITY	OVERVIEW
Council Plan strategic alignment	**We need to strengthen the strategic alignment in delivering on the Council Plan 2022-27 outcomes and measures alongside a rationalisation of our City Strategies.** *A number of services have identified challenges with aligning their activities to Council Plan Outcomes or Measures. There is opportunity to review the Council Plan to provide more specific links for our services, alongside a review / rationalisation of our City Strategies to better guide expectations of our services.*
Service delivery model	**We need to further define Service Delivery models for each service and improve integration across our new Target Operating Model.** *Many services have identified the need to clearly define Roles and Responsibilities and required service delivery model (across the organisational structure) to ensure accountability for the effective and efficient delivery of our services.*
Service objectives and KPIs	**Service Objectives and KPIs are defined, but we need further work to establish Service KPI baselines and targets with alignment to the future state of City Strategies.** *Many services have identified challenges in defining Service KPI baselines and targets, and these measures of effectiveness have not historically been a focus in performance reporting. Maturing our suite of Service KPIs is essential to demonstrating how our services contribute to achieving our Council Plan Outcomes.*
Service activities and service level measures	**Service Activities and Service Levels are defined and provide a good starting point, but further work is needed to rationalise and improve their description and measurement.** *Establishing clear service activities and quantifiable Service Level Targets has been a key challenge for many services and further work will be required to ensure service delivery can be efficiently tracked and reported at an appropriate frequency to inform decision making. Further work is required to improve forecasting of these Service Levels to demonstrate long-term sustainability and inform planning including resources, assets and financial planning.*
Customer centric approach	**We need to improve the quality of the customer data that informs our services.** *Varying levels of customer related data has been presented across the portfolio of services, but many have acknowledged the need for better definition and understanding of customer expectations. An organisation-wide approach to voice of customer and methodology for measuring and reporting of customer measures presents an opportunity to better inform and track customer input into the design of our services, putting customers at the centre of our decision making.*

DRAFT

Service Catalogue 2024/25

The City's Service Catalogue consists of 75 Services (47 Community and Customer Services and 28 Enabling Services). The Service Catalogue will continue to be refined as the Service Planning Lifecycle is implemented.

DIVERSE THRIVING ECONOMY

We have sustainable economic growth in the industries and sectors that offer opportunity
- Commercial Transactions
- Investment Facilitation and Partnerships
- Local Industry, Trade and Export Development

We develop, attract and retain the best talent in our city
- Services delivered by Experience Gold Coast

We are the best place to visit in Australia
- Services delivered by Experience Gold Coast
- Tourist Parks and Campgrounds

VIBRANT LIFESTYLE

We are a safe, active and healthy community
- Animal Management
- Community Events
- Community Grant
- Community Group Support
- Community Safety
- Community Sport and Recreation
- Lifeguards
- Local Law Enforcement
- Public and Environmental Health
- Public Space Activation
- Vector, Urban Pest and Biosecurity

We have accessible community and cultural infrastructure which supports social connections
- Arts and Cultural Development
- Cemetery
- Community Aquatic Centre
- Community Centre Management
- Community Library
- Cultural Heritage and First Nations Engagement

CONNECTED COMMUNITY

We provide safe and sustainable travel choices to enable us to move around the city easily
- Transport

We have beaches, parklands, waterways and natural places that are accessible and enjoyed by everyone
- Beaches and Waterways
- Community Parks

We are a digitally connected city
- Commercial Fibre Network

NATURALLY UNIQUE

We have a healthy and connected environment network
- Environmental Conservation

We design our city growth to protect our natural environment
- Natural Area Conservation

LIVABLE PLACES

We plan city growth and ensure sufficient capacity and types of housing to meet future needs
- Building Certification and Information
- City Cleaning
- City Design
- City Planning
- Trade Waste and Bulk Liquid Receival
- Development Application Assessment & Support
- Drinking Water Distribution
- Recycled Water Distribution

We manage our resources for a sustainable future
- Public Litterbins
- Sewage Collection and Treatment
- Solid Waste Disposal (Resource Recovery)
- Waste Collection
- Waste Recycling

We have a prepared community and a natural and built environment resilient to hazards
- Disaster and Emergency Management
- Flood Mitigation
- Stormwater

ONE CITY

We address the challenge of climate change through practical and sensible solutions that deliver climate resilience
- Climate Resilience

We partner to leverage legacy outcomes and emerging opportunities for the city ahead of the Brisbane 2032 Olympic and Paralympic Games
- 2032 Olympic and Paralympic Games

We are a high performing, customer focused organisation which delivers value for money services to our community
- Asset Management
- Business Improvement
- Business Support
- Chamber Support
- Councillor Support
- Transformation, Innovation and Change
- Controlled & Funded Entities

Customer and Channels Service (2/2)

Service Logic Table (Continued)

Service Objective	Service KPI	Service Activities	Service Level Measure
We ensure customer contact needs have resource planning, telephony and niche support	Forecasting and Planning accuracy variation	Conduct Forecasting and Planning for Workgroup volumes (Calls, Emails, Walk-Ins, Chat)	Weekly
	Customer satisfaction with interactions	Conduct real time management of telephony platform, connectivity, reporting and branch assets	Daily
We ensure quality assurance and escalated complaint resolution.	# of customer complaints requiring escalation	Manage complaint response	2 Business Days
		Deliver Total Quality Management	90%
		Deliver evaluation sample	300 per month
		Deliver quality evaluation and real time Tier 2 support availability.	> 95% KPI delivered.
We support customer Meter reading support for water notices	# Customer disputes with water and Sewerage Rate validity/accuracy of customer notices	Manage water read completions	98% on schedule
		Manage Misread response time	2 business days
		Manage Cross meters	2 business days
		Deliver Meter Investigations	2 business days
We provide administrative support for waste related City assets and renewals.	% customer satisfaction with interactions	Real time phone advice to Consultants	<4 minutes
		Email response times - Maintaining waste accounts / Temporary bin holds	2 business days
		Manage administrative updates to waste collection, City asset services, bonds, refunds, renewals.	2 business days
We support customer applications processes for water relief/leakage assessments	% customer satisfaction with interactions	Conduct administrative functions for water relief/leakage applications processes	4,500 per year
		Deliver CAP	2 Business days
		Deliver water assist	2 business days
		Deliver Plumbing Reimbursements	2 business days
		Deliver Concealed Leak Remission	10 business days
		Conduct Formal Reviews – Preliminary Findings	20 days
		Conduct Formal Reviews - Final	30 days
We deliver the right mix of services in a sustainable way.	% of service improvement plan benefits realised	Deliver Service Improvement Plan (Customer and Channels Service Plan)	15 specific improvement projects

To be defined as part of Release 2 Service Plans	To be defined as part of Release 2 Service Plans	To be defined as part of Release 2 Service Plans	To be defined as part of Release 2 Service Plans

Service Logic Table

Service Objective	Service KPI	Service Activities	Service Level Measure
Distribute safe and reliable drinking water to customers	100% Compliance with the drinking water quality management plan as required under the Water Supply (Safety & Reliability) Act 2008	Drinking water quality incidents are managed as described in the Incident Response Plan to ensure the protection of public health	100% of priority one response time is achieved for drinking water incidents (% of priority one jobs responded to within two hours)
		Monitor drinking water quality in accordance with the verification monitoring plan described in the DWQMP	*E. coli* must not be detected in at least 98% of the samples reviewed (rolling annual value reported in the drinking water service annual report)
	Customer satisfaction with drinking water services	Install water meters in a timely manner for new properties	Average response time to install water meter
		Investigate drinking water quality complaints	< 3 drinking water quality complaints per 1000 properties
We plan, construct and maintain drinking water infrastructure	We manage our critical assets appropriately	Conduct asset condition assessments for critical water assets	% of critical water main asset condition assessment complete per year compared to CA plan
	< or equal to 12 drinking water main breaks per 100km	Replace drinking water assets / water assets in poor condition	% of delivery of scoped renewals in planned timeline complete
		Repair water asset breaks	Average duration of unplanned water interruptions target <120mins
		Meet water pressure standards of service	# of pressure tests conducted and results shared with customer when low pressure complaints are received
We ensure the community has a secure water supply	Network demand forecast is developed as required by SEQ water retailers	Water forecast model achieved and delivered to bulk water supplier Seqwater	Demand forecast supplied to schedule
	Network management to manage unaccounted for water	Conduct leak detection checks	% of network checked for leakage via targeted leak detection
		Targeted replacement of meters that are identified as likely to be under reading.	% replacement of meters within age and cohort groupings

Disaster and Emergency Management Service (1/3)

Service Overview

Service Name	**Disaster and Emergency Management Service**
Service Group	**Disaster and Emergency Management Service Group**
Service Description	**Deliver effective disaster management arrangements to enable the City to mitigate, prevent, prepare for, respond to and recover from disaster events.**
Council Plan Outcome	**We have a prepared community and a natural and built environment resilient to hazards**
Council Plan KPI	**Improve the Disaster Resilience for Cities Score**
Service Owner	**GM, Disaster and Emergency Management**
Legislative Mandate	***Disaster Management Act 2003, Disaster Management Regulation 2014, Fire and Emergency Services Act, 1990***

Summary Resource Requirements (Direct Only)

FTE	Revenue ($)	Expenses ($)	Net ($)
21 (+5 embedded)	**$764,345**	**$9,349,113**	**$8,584,768**

Service Logic Table

Service Objective	Service KPI	Service Activities	Service Level Measure
We reduce residual risks to people and property adjoining City owned or managed land	Overall bushfire risk profile rating on Council owned land.	Conduct Residual risk assessments for hazard reduction burn sites	100% of hazard reduction burn sites
		Undertake hazard reduction burn activities in identified high-risk locations reducing from intolerable to tolerable or acceptable. (where optimal burn conditions exist and where resourcing is available)	100%
We ensure that the community has preparedness to inform decisions in the event of adverse events	Increased disaster resilience in the Gold Coast community engagement and awareness campaigns	Engage with the Gold Coast Community (Events and online)	2024 Plan delivered
			55% households have an Emergency Plan
	# of events attended to increase awareness responsibilities under s69 of the *Fire and Emergency Services Act, 1990.*	Increase participation in community reducing the risk on their land	3% increase in the number of Gold Coast households with a plan and emergency kit items
			10 engagements (s69)
	% of dwellings on the Gold Coast with an Emergency Plan and emergency kit items	Engage to support the development of localised community response and recovery plans for vulnerable members of the community.	8 communities

DRAFT

Note – the Local Disaster Management Group (LDMG) is a legislated group under the *Disaster Management Act, 2003*. The LDCC is the Local Disaster Coordination Centre

Emergency and Disaster Management Service (2/3)

Service Logic Table (continued)

Service Objective	Service KPI	Service Activities	Service Level Measure
We maintain an operationally effective disaster coordination Centre to enable us to respond to adverse events	% of material issues from operational checks resolved within approved timeframe	Monitor operational capability based on risk	24hr x 7 days a week , 100% of the time
		Complete monthly LDCC technical and operational check	Monthly
		Complete City Joint Operations Building concept Phase 1 completed	100%
	LDCC Technology Uptime	LDCC Technology maintains a 99% uptime and is operational within 15min	99%, 15 mins
We provide shelter for vulnerable members of the community during adverse events	% of material issues identified from exercises resolved within approved timeframe	Ensure Evacuation centres and kits are available and ready.	100%
		Ensure HRS contract is active and has been used or exercised	Activated or Exercised Annual
	% LDCC staff compliant with training pathway and Queensland Disaster Management Training Framework	Conduct Exercises with existing LDCC staff (desktop and functional)	9 exercises per year
			50% of exercises are multi-agency
		Deliver training for new LDCC staff	2 Annually (informed by attrition)
			85% staff trained
We ensure the LDMG is compliant with legislative requirements	% legislative compliance of LDMG with the requirements of the *Disaster Management Act 2003*	Develop and review Legislatively required Plans & Sub-Plans	100% Annually
	Annual test of effectiveness of the LDMP	Conduct LDMG IGEM assessment	Annual
	# of Gold Coast Alert Subscribers	Promote, Manage and upkeep Gold Coast Alerts subscriptions	20,000
	% achievements of LDMG compliance activities	Conduct LDMG compliance activities	Annual Program
	# Flood warning areas identified, based on flooding risk	Implement Flood CAST Phase 1 by November 2024	20
	AWS implemented across Flood Warning Areas		100%
We ensure the city has effective partnerships that enable the city to respond to adverse events	% of LDMG exercises run as multi-agency exercises	Exercise scheduled LDMG activities	100% agency attendance (risk based)
	% of LDMG meetings with agency attendance	Conduct LDMG Meeting	75% attendance (Quarterly)
		Conduct LRG Meeting	75% attendance (Bi-Annual)
We advocate for community betterment as we adapt to climate change	# household resilient program grants submitted	Grant program developed, trialled and evaluated	20
	$ financial contribution secured for community betterment through external funding streams	Deliver Voluntary Home Buy Back Scheme Delivery actions	100% of schedule

DRAFT

Emergency and Disaster Management Service (3/3)

Service Logic Table (continued)

Service Objective	Service KPI	Service Activities	Service Level Measure
We coordinate event specific functional local recovery groups (plus four subgroups) to respond to adverse events	% of grants and event specific local recovery plan benefits met	Deliver event specific local recovery plans within agreed timeframes.	100%
		Deliver program reporting within the grant funding agreement timeframes to external funding bodies	100%
We provide suitable infrastructure for the State Emergency Service	% of benefits of the SES Strategic Plan realised	Develop and review SES Strategic Plan	Annual
We provide Places of Refuge for vulnerable members of the community during adverse severe wind events	% of vulnerable populations with access to a Place of Refuge	Provide available buildings (within current or proposed City projects) to function as Places of refuge	2 locations
We explore all possible opportunities for external and co-funding opportunities	% of external funding opportunities have one or more applications submitted	Submit grant applications	75%
	# project business cases and project plans developed for future funding opportunities	Develop project business cases and project plans developed for future funding external and co-funding opportunities.	5 per year
We partner with research entities and identify strata property risks to severe wind hazards and cyclones	% of Strata Title property managers engaged in program	Develop and implement Strata Title study program	Annual
We ensure we manage risks associated with the service	% of risks managed within current risk appetite	Update DEMU Risk Register with new functions (including fire management)	Biannual
We ensure appropriate governance of our service	% of material issues identified from structure reviews or committees resolved within approved timeframe	Environment, Heritage and Resilience (EHR) Executive Leadership Team Sub Committee meetings attendance, and progress reports provided	100%
		Conduct DEMU structure reviews	4 per year
	% of Folio Reviews completed within current budget tolerances.	Conduct Performance Reporting	Monthly
We ensure our Priority Services are resilient to threats and disruption	% of material issues identified from exercising business continuity plan resolved within approved timeframe	Review and update Business Impact Analysis	Annual
