9.1 Rates and charges 8

9.1.1 Differential general rates 8

9.1.2 Averaging of valuations 71

9.1.3 Separate rates and charges 72

9.1.4 Water utility charges – potable (drinking) water 73

9.1.5 Water utility charges – non-drinking water (Pimpama-Coomera dual reticulation area) 82

9.1.6 Water utility charges – raw (untreated) water 84

9.1.7 Water utility charges – non-drinking water 84

9.1.8 Water utility charges – non-drinking water (Northern supply scheme) 86

9.1.9 Sewerage utility charges 90

9.1.10 Sewerage (trade waste) utility charges 99

9.1.11 Waste management utility charges 107

9.1.12 Recycling utility charges 109

9.1.13 Waste management access charge 110

9.2 Rebates and other concessions 110

9.2.1 Pensioner Rates Rebate – Home Owners 110

9.2.2 Pensioner Rates Rebate – Non-Home Owners 112

9.2.3 Rates & charges – Not-for-profit organisations 113
9.2.4 Rates & charges – Voluntary Conservation Agreements 113
9.2.5 Water & Sewerage Charges 114
9.2.6 Commercial charge concessions 114
9.3 Limitations on increases in rates and charges 114
9.4 Cost-recovery fees and commercial charges 114
Appendix 1 118

1. General approach

Council of the City of Gold Coast (Council) has developed this Revenue Statement in accordance with its Revenue Policy and pursuant to *Local Government Regulation* section 172.

Council aims to raise sufficient revenue to enable Council to:

- ensure a balanced budget and provide a strong financial basis for effective management of expenditure programmes and debt
- provide services to the community based on principles of intergenerational equity
- sustain operating capability on a long-term basis
- encourage a strong, growing and sustainable local economy with appropriate levels of infrastructure assets and facilities
- provide certainty of funding for the provision of infrastructure identified by Council in its long-term strategic financial plans and asset management plans.

Council applies the following principles when making and levying rates and charges:

- Equity and fairness – ensuring the fair and consistent levying of rates and charges, without bias, taking account of all relevant considerations.
- Equity for like properties – ensuring similarly valued land, used for the same or similar purposes, and receiving similar services are levied similar general rates.
- User pays – where appropriate, levying rates and charges on the specific users of services or facilities to assist in alleviating the costs associated with the provision of the service or facility on the general community.
- Meaningful contribution – recognising that not all properties utilise or rely on Council services equally and adopting a differential rating system to ensure that all properties provide a meaningful contribution to the costs of Council providing services or facilities.
- Predictability – ensuring rates and charges are set and applied in a generally consistent manner and any significant increases in rates and charges are reasonable and transparent.

2. Rebate concessions

Subject to the conditions determined from time to time and outlined in section 9.2 below, Council may grant rebates on rates and charges to approved pensioners who are owner-occupiers of their principal place of residence.

An approved pensioner is one who is:

- a person who holds a current Queensland Veteran Gold Card (issued by the Department of Veteran Affairs); or
- a person who holds a current Queensland issued Pensioner Concession Card.

Council may grant rebates of rates and charges to assist not-for-profit community organisations of the classes identified in Council's Assistance Policy.

Subject to the conditions determined from time to time in Council's Assistance Policy, Council may grant rebates of differential general rates, or parts of differential general rates, and the Open Space including Koala Habitat, Maintenance and Enhancement separate charge, to assist ratepayers who are parties to Voluntary Conservation Agreements with Council, to manage the natural value of their land parcels the subject of the agreements.

In accordance with the *Customer Water and Wastewater Code* and subject to the conditions determined from time to time in Council's Concealed Water Leak Policy, Council may grant rebates of water and sewage (wastewater) usage charges, to relieve ratepayers from some of the unexpected financial burden caused by a concealed underground water leak.

Subject to the conditions determined from time to time in Council's Assistance Policy, Council may grant rebates of water and sewage (wastewater) usage charges, to relieve ratepayers from the unexpected financial burden caused by usage of water to fight a fire to protect their home or business.

Subject to the conditions determined from time to time in Council's Assistance Policy, Council may grant rebates of water and sewage (wastewater) charges, to relieve ratepayers who are renal dialysis patients, from the additional financial burden caused by a need to have dialysis at home.

Council may provide relief against financial hardship in extreme circumstances where it considers relief is justified and in the interests of the community. In these instances, and subject to the conditions determined by resolution of Council, rebates of rates and charges may be granted.

Council may provide relief for the purpose of encouraging economic development in the City where it considers that providing such relief will aid economic growth. In these instances, and subject to the conditions determined by resolution of Council, rebates of rates and charges may be granted.

3. Deferment concessions

Council may defer payment of specific rates (as defined in Council's Hardship Policy) to assist those pensioners who are owner-occupiers of their principal place of residence until their circumstances change or the property ownership changes.

Rates available for deferment are:

- a portion of the differential general rate in an ongoing capacity, and/or
- all rates and charges at a point in time where the eligible ratepayers may seek a one-off deferment as the account is being considered for sale of land action under the *Local Government Regulation* (chapter 4, part 12).

4. Instalment payment concessions

Council may agree to allow the payment of rates and charges by instalments upon terms consistent with its Hardship Policy as determined from time to time.

5. Discount

Council reserves the right to provide ratepayers with a prompt payment discount on certain rates and charges under certain conditions as defined in Council's rating resolutions.

6. Recovery of rates and charges

Council will exercise its recovery powers to reduce the overall rate burden on ratepayers, guided by the following principles:

- making clear the obligations of ratepayers and the process used by Council in assisting them to meet their financial obligations
- making the processes used to recover outstanding rates and utility charges simple to administer and cost effective
- considering the capacity to pay in determining appropriate payment plans for different sectors of the community
- endeavouring to treat ratepayers with similar circumstances in a consistent way
- flexibility to ratepayers experiencing financial hardship through concessional arrangements and
- flexibility responding when necessary to city wide events such as natural disasters or changes in the local economy.

7. Community service obligations

Council may subsidise the operations of commercialised business units, or other operations that are subject to the Code of Competitive Conduct (vide *Local Government Act* section 47), to achieve social, economic, environmental, or other objectives associated with, or incidental to, the delivery of services by those operations.

Council may charge for such activities at a rate less than the full cost price of a service. The difference between the full cost price and the actual charge will be treated as a community service obligation (CSO) (vide *Local Government Regulation* section 24). To ensure compliance with the requirement that CSOs be transparent, fully costed, and funded, each CSO will be funded from an identified budget. The budgeted amount will be based on the agreed unit price and the estimated quantity to be provided.

8. Statutory references

In this revenue statement, the short-form name in the left column below is a reference to the Act or Regulation described in the right column, adjacent the short-form name:

Short-form name	Long-form name

Sanctuary Cove Resort Act	*Sanctuary Cove Resort Act 1985*
Waste Reduction and Recycling Act	*Waste Reduction and Recycling Act 2011*

9. Explanation of rates and charges

9.1 Rates and charges

9.1.1 Differential general rates

A differential system of general rates provides equity through recognising different uses made of different rateable lands (both generally and with respect to the revenue-producing potential) and different service levels generated or potentially generated by different rateable land.

For that purpose, rateable land in the city is differentiated into the 159 rating categories detailed in the following Table of Differential Categories. The basis for developing criteria that distinguish a category is the identification of particular characteristics or factors shared by all lands to be included in the category.

Each row of the Table of Differential Categories contains the relevant details for each of the 159 differential rating categories as follows:

Column 1 specifies the rating category number.

Column 2 contains a description of the land in the rating category.

Column 3 specifies the rate in the dollar of each rating category.

Column 4 specifies the minimum general rate of each rating category.

For the purpose of categorising rateable land, and deciding differential rates for rateable land, Council will have regard without limitation, to the following factors:

- whether or not the land is the principal place of residence of the owner.
- the extent to which tourism, economic diversification and industry uses continue to contribute to the demand for the provision of Council services across the city. Council considers that land used for those businesses (including premises used to provide rental accommodation to itinerants) and industries should generate a greater contribution to general rate revenue than land that is not used for a commercial purpose (including premises used to provide rental accommodation to itinerants.
- the funding of its inspection program for rental accommodation within the city. The City has a rental accommodation program, which includes risk-based and complaint-based inspections, to monitor compliance with minimum public health and safety standards under *Subordinate Local Law No. 16.1 (Rental Accommodation) 2008.* Council considers that rental properties should generate a greater contribution to general rate revenue than land that is not rented.
- the extent to which multi-dwelling residential buildings and multi-dwelling residential properties contribute to the demand for the provision of Council services across the city. Council considers that those multi-dwelling residential buildings and multi-dwelling residential properties should make a greater contribution to general rate revenue than single-dwelling buildings or properties.

Setting the rate in the dollar for each rating category is influenced by fluctuations in site value (non-rural land) and unimproved value (rural land) determined under the *Land Valuation Act*. However, substantial increases or reductions in land valuations do not necessarily generate an increase or reduction in demand for the provision of Council services to such lands. Averaging of valuations over 3 years will apply to help minimise the impact of increases in site value and unimproved value.

Table of Differential Categories

Column 1 (Category)	Column 2 (Description)	Column 3 (Rate [cents] in the Dollar)	Column 4 (Minimum General Rate)
Single unit dwellings not rented			
1A	(1) Land: (a) that is not a lot in a community titles scheme or multi-dwelling residential building or multi-dwelling residential property; and (b) used for a single unit dwelling; and (c) not used to provide rental accommodation to either permanent residents or itinerants at any time during the rating period (2) vacant land usable, under the City Plan, for a residential purpose (as-of-right or pursuant to an issued development approval) other than residential development land. (3) All other rateable land that does not fall within another category.	0.251767	$1,297.90
1P	Land: (1) that is not a lot in a community titles scheme or multi-dwelling residential building or multi-dwelling residential property; and (2) subject to the constraints imposed on lands included in: (a) the Rural Zone under the City Plan; or (b) the Conservation Zone under the City Plan; and (3) not used to provide rental accommodation to either permanent residents or itinerants at any time during the rating period.	0.246761	$1,233.10

Column 1 (Category)	Column 2 (Description)	Column 3 (Rate [cents] in the Dollar)	Column 4 (Minimum General Rate)
Residential community titles lots not rented			
1BA	A residential lot: (1) created on a Group Titles Plan or Standard Format Plan that is part of a community titles scheme (horizontal orientation); and (2) where the community titles scheme contains a maximum of 2 community titles lots; and (3) the residential lot is not used to provide rental accommodation to either permanent residents or itinerants at any time during the rating period.	0.318988	$1,297.90
1CA	A residential lot: (1) created on a Group Titles Plan or Standard Format Plan that is part of a community titles scheme (horizontal orientation); and (2) where the community titles scheme contains greater than or equal to 3 community titles lots; and (3) the residential lot is not used to provide rental accommodation to either permanent residents or itinerants at any time during the rating period.	0.341144	$1,297.90

Column 1 (Category)	Column 2 (Description)	Column 3 (Rate [cents] in the Dollar)	Column 4 (Minimum General Rate)
Residential units not rented			
1G	A residential lot: (1) created on a Building Units Plan or Building Format Plan that is part of a community titles scheme (vertical orientation); and (2) having a total floor area of 70m^2 or less; and (3) located within levels 5 to 10 above ground; and (4) not used to provide rental accommodation to either permanent residents or itinerants at any time during the rating period; and (5) used as the principal place of residence by at least one of the owners.	0.436669	$1,427.80
1H	A residential lot: (1) created on a Building Units Plan or Building Format Plan that is part of a community titles scheme (vertical orientation); and (2) having a total floor area of more than 70m^2 up to and including 150m^2; and (3) located within levels 5 to 10 above ground; and (4) not used to provide rental accommodation to either permanent residents or itinerants at any time during the rating period; and (5) used as the principal place of residence by at least one of the owners.	0.456518	$1,492.70

Column 1 (Category)	Column 2 (Description)	Column 3 (Rate [cents] in the Dollar)	Column 4 (Minimum General Rate)
1I	A residential lot: (1) created on a Building Units Plan or Building Format Plan that is part of a community titles scheme (vertical orientation); and (2) having a total floor area of more than 150m^2; and (3) located within levels 5 to 10 above ground; and (4) not used to provide rental accommodation to either permanent residents or itinerants at any time during the rating period; and (5) used as the principal place of residence by at least one of the owners.	0.476366	$1,557.50
1J	A residential lot: (1) created on a Building Units Plan or Building Format Plan that is part of a community titles scheme (vertical orientation); and (2) having a total floor area of 70m^2 or less; and (3) located within levels 11 to 20 above ground; and (4) not used to provide rental accommodation to either permanent residents or itinerants at any time during the rating period; and (5) used as the principal place of residence by at least one of the owners.	0.476366	$1,557.50
1K	A residential lot: (1) created on a Building Units Plan or Building Format Plan that is part of a community titles scheme (vertical orientation); and (2) having a total floor area of more than 70m^2 up to and including 150m^2; and (3) located within levels 11 to 20 above ground; and (4) not used to provide rental accommodation to either permanent residents or itinerants at any time during the rating period; and (5) used as the principal place of residence by at least one of the owners.	0.496215	$1,622.40

Column 1 (Category)	Column 2 (Description)	Column 3 (Rate [cents] in the Dollar)	Column 4 (Minimum General Rate)
1L	A residential lot: (1) created on a Building Units Plan or Building Format Plan that is part of a community titles scheme (vertical orientation); and (2) having a total floor area of more than 150m^2; and (3) located within levels 11 to 20 above ground; and (4) not used to provide rental accommodation to either permanent residents or itinerants at any time during the rating period; and (5) used as the principal place of residence by at least one of the owners.	0.516064	$1,687.30
1M	A residential lot: (1) created on a Building Units Plan or Building Format Plan that is part of a community titles scheme (vertical orientation); and (2) having a total floor area of 70m^2 or less; and (3) located within levels 21 to 40 above ground; and (4) not used to provide rental accommodation to either permanent residents or itinerants at any time during the rating period; and (5) used as the principal place of residence by at least one of the owners.	0.516064	$1,687.30
1N	A residential lot: (1) created on a Building Units Plan or Building Format Plan that is part of a community titles scheme (vertical orientation); and (2) having a total floor area of more than 70m^2 up to and including 150m^2; and (3) located within levels 21 to 40 above ground; and (4) not used to provide rental accommodation to either permanent residents or itinerants at any time during the rating period; and (5) used as the principal place of residence by at least one of the owners.	0.535912	$1,752.20

In the Table of Differential Categories:

(1) ***aged care facility*** means a facility at which aged care service is provided to residents in accordance with the *Aged Care Act (Cth)*;

(2) ***averaged value*** means the 3-year averaged value of the land calculated in accordance with *Local Government Regulation* section 76;

(3) a ***Building Units Plan*** or a ***Building Format Plan*** is one that shows the building subdivided vertically and/or horizontally into lots, and shows the common property (e.g. a high rise or a low rise apartment building);

(4) a ***business activity***:

(a) is an activity directed at generating income or revenue, or facilitating income or revenue generation, and

(b) includes an industrial activity, and

(c) does not include a purely residential activity or an environmental conservation activity;

(5) ***City Plan*** is the name of the City of Gold Coast planning scheme;

(6) ***community titles lot*** means a lot in a ***community titles scheme***;

(7) a ***community titles scheme*** is:

(a) a community titles scheme created under the *Body Corporate & Community Management Act*, or

(b) a subdivisional scheme:

(i) created by a Building Units Plan or Group Titles Plan (as defined), and

(ii) governed by the *Building Units & Group Titles Act*

(including a scheme created under the *H.S.P. Nominees Acts*, the *Sanctuary Cove Resort Act*, the *Integrated Resort Development Act* or the *Mixed Use Development Act*);

(8) ***dwelling*** means a building, or a part of a building, used or capable of use as a ***self-contained*** residence;

(9) ***farming*** means farming business as defined by *Land Valuation Act* section 48 (4);

(10) ***gross lettable area retail (GLAR)*** refers to the Property Council of Australia method of area calculation for retail tenancies in shopping centres;

(11) ***ground*** refers to the existing ground upon which the building containing the lot is located: the ground floor of a building will be level 1; the first level above the ground floor will be level 2; the second level above the ground floor will be level 3, etc.

Note that when a lot is located on more than one level of a building, the level of the lot is, for the purposes of the following categories and criteria, the highest level upon which the lot is located;

Example – A lot located on level 20 and level 21 of a building is treated as located on level 21 for the purposes of categorisation.

(12) a ***Group Titles Plan*** or a ***Standard Format Plan*** is one in which the land (rather than a building) is subdivided into lots and common property (e.g. townhouse complex);

(13) ***Independent Living Unit*** means, in the context of a retirement village, a dwelling, with or without a laundry, for which some level of support is or may be provided to the resident, though that support is intended to be minimal or restricted to emergent circumstances because the primary intent of the village is to enable independent living;

(14) ***itinerant*** means a visitor, tourist, or any other person who stays at a given property on a short-term basis (fewer than 42 consecutive days at any one time), as distinct from a permanent resident;

Note: The presence of listings or advertising/marketing, for example on publicly available websites and/or with real estate agents, will constitute evidence of a property being used to provide accommodation to itinerants for short-term occupation.

(15) ***life tenant***, of a single-unit dwelling or residential unit or of a multi-dwelling residential building, means a natural person who does not own a 50% or greater interest in any other residential property, to whom a life tenancy of the dwelling, unit, or building has been granted:

(a) under a valid will made by the deceased owner of the property; or

(b) pursuant to the order or declaration of an Australian superior court (including the Federal Circuit Court and Family Court of Australia); and

(c) upon terms obliging the person to pay the rates for the property;

(16) ***lives*** means, for a given place, to make one's home on a long-term basis (greater than or equal to 42 consecutive days at any one time);

(17) ***lot*** means, for a community titles scheme, a discrete lot forming part of the scheme land;

(18) ***multi-dwelling residential building*** means land comprising one or more buildings consisting of two or more residential dwellings used to provide rental accommodation to either permanent residents or itinerants, other than:

(a) a residential building subdivided into lots forming part of a ***community titles scheme***; or

(b) a residential building registered as a ***retirement village*** or the like; or

(c) a residential building registered as an ***aged care facility***; or

(d) a ***multi-dwelling residential property***;

(19) ***multi-dwelling residential property*** means land such as a multi-dwelling residential community or residential park used to provide residential accommodation exclusively to permanent occupants, comprising of attached and detached single-unit dwellings, residential units, common areas and facilities for use by its residents, and includes:

(a) over-50s lifestyle resorts;

(b) relocatable home parks;

(c) retirement villages;

(d) aged care facilities;

but for clarity, a ***multi-dwelling residential property*** does not include premises required to be licensed under *Local Law No. 16 (Licensing) 2008* for the operation of rental accommodation;

(20) ***permanent resident*** means a person who ***lives*** at a given property on a long-term basis (greater than or equal to 42 consecutive days at any one time), as distinct from an itinerant;

(21) ***principal place of residence*** means:

(a) a single-unit dwelling or residential community title lot at which:

(i) at least one person who owns the dwelling or lot predominantly lives; or

(ii) at least one person who is a life tenant of the dwelling or lot predominantly lives;

(b) a single-unit dwelling or residential community titles lot:

(i) in which the owner or a life tenant predominantly lived immediately before being admitted to a nursing or convalescence institution; and

(ii) at which the owner or the life tenant will resume living upon being discharged from the nursing or convalescence institution; and

(iii) that remains unoccupied throughout the period of the owner's or the life tenant's residence at the nursing or convalescent institution; or

(c) a multi-dwelling residential building (for example, a duplex):

(i) in which at least one owner or life tenant of the building predominantly lives; and

(ii) no part of which is offered for rent;

but, ***principal place of residence*** does not include a single-unit dwelling, a residential community titles lot, or a multi-dwelling residential building that is:

(a) owned by an entity other than a natural person (e.g. a company or an incorporated association); or

(b) owned by a person as trustee of a trust; or

(c) occupied not by at least one of its owners but by another person or other persons (including a member or members of the owner's family), whether or not in return for rent or other reward; or

(d) vacant, whether permanently or temporarily (for more than 120 days in the financial year), including for the purposes of renovation, except where:

(i) the single-unit dwelling or residential community titles lot being renovated otherwise remains the principal place of residence of the owner for purposes of this definition and the owner/s do not own any other single-unit dwelling or residential lot that they claim to be their principal place of residence; or

(ii) the single-unit dwelling or residential community titles lot is continuously vacant for more than 120 consecutive days of the financial year due to the owner/s absence on an extended holiday provided the dwelling or lot remains vacant for the entire period of their absence;

Note: In establishing principal place of residence, Council may consider any relevant material including nominated addresses for electoral, taxation, social security, or national health registration purposes.

(22) ***prospective residential development land*** means a parcel of predominantly vacant land, not smaller than 2 hectares in area, and used for no purpose other than residential dwelling, but:

(a) that is zoned under the ***City Plan*** for residential development, or

(b) for which a development approval has issued enabling its use for residential development;

(23) ***rating period*** means the date range identified on a rate notice as the 'current rating period';

(24) ***rental accommodation*** means land required to be licensed under *Local Law No.16 (Licensing) 2008* for the operation of rental accommodation and for the purpose of categorisation includes land the subject of a time share scheme, or similar arrangement; includes land the subject of a lifetime lease, lifetime licence, company share scheme or time share scheme, or similar arrangement;

(25) ***residential development land*** means a parcel of vacant land, not smaller than 2 hectares in area, which:

(a) is zoned under the ***City Plan*** for residential development, or

(b) for which a development approval has issued enabling its use for residential development;

(26) ***residential lot*** means:

(a) a separate, distinct parcel of land used for a residential purpose pursuant to the planning controls applicable to it under statute, or

(b) a parcel of vacant or predominantly vacant land, and

(c) that may be developed or used only for a residential purpose pursuant to the planning controls applicable to it under statute;

(27) ***retail warehouse*** means a building that has the potential predominant use of or has been adapted to be used as retail outlet(s) that principally offer:

(a) hardware and home improvements, including gardening and landscaping, or

(b) electrical appliances including entertainment and white goods, or

(c) furnishings and décor, or

(d) retail sellers of particular categories of goods, i.e. household, office, leisure, pharmaceutical or bulk food;

(28) ***retirement village*** means a retirement village for the *Retirement Villages Act*, i.e., premises, not including a site within the meaning of the *Manufactured Homes (Residential Parks) Act*, where older members of the community or retired persons reside, or are to reside, in independent living units or serviced units, under a retirement village scheme;

(29) ***self-contained*** means, for a dwelling (such as an ***Independent Living Unit***), that it contains:

(a) food preparation facilities including a functional cook top,

(b) a bath or shower,

(c) a wash basin,

(d) a toilet, and

(e) a laundry.

(30) ***total floor area*** means the total of all parts of a lot including balconies, courtyards, garages, storage areas and the like, regardless of whether the lot is wholly contained within one level, or more than one level, of a building;

(31) ***visitor or tourist*** means a person visiting a person or place for a temporary period.

9.1.2 Averaging of valuations

Valuation averaging will apply in the 2025-26 financial year. The principle is that the values effective for the 2025-26 financial year and each of the two previous financial years (2023-24 and 2024-25) will be averaged (the “3-year averaged value”). The 3-year averaged value will be used as the rateable value for calculation of the differential general rates and special rates in 2025-26 unless the 3-year averaged value is more than the actual value of the land for the 2025-26 financial year.

9.1.3 Separate rates and charges

Open space including koala habitat, maintenance and enhancement separate charge

The Open Space including Koala Habitat, Maintenance and Enhancement Separate Charge of **$63.00** will be applied equally to all rateable land within the city. The funds raised will be expended for the purpose of open space maintenance and enhancement, including land acquisitions and non-acquisition purposes directly relevant to open space preservation, maintenance, access and nature conservation, acquiring and enhancing land for koala habitat within the city, including all ancillary costs in relation to the land acquisition.

Recreational space separate charge

The Recreational Space Separate Charge of **$30.88** will be applied equally to all rateable land within the city. The funds raised will be expended for the purpose of providing open space for active and passive recreational activity by the community through the acquisition or other works to prepare land for use (i.e. by purchase, reclamation, land works or other lawful means) of open space land within the city, and arrangements with the State government for community use of schools' sporting and recreation facilities, as adjuncts to Council owned or controlled open space recreational land;

City transport improvement separate charge

The City Transport Improvement Separate Charge of **$230.00** will be applied equally to all rateable land within the city. The funds raised will be expended for the purpose of implementing the City Transport Plan, to expand the city's transport infrastructure and enhance its ability to meet the city's growing public transport needs, and pursue the initiatives under the banner of its City Transport Plan to improve roads, to expand public transport services, to improve bicycle and pedestrian transit, and generally to facilitate rapid transit within the city (those initiatives to include negotiating with the State for additional funding and partnering with public and private organisations to improve State controlled roads).

Volunteer fire brigade separate charge

The Volunteer Fire Brigade Separate Charge of **$2.00** will be applied equally to all rateable land within the city. The funds raised will be expended for the purpose of contributing to the costs of the city's rural fire brigades, in recognition of the importance that the city's rural fire brigades represent to the safety, amenity and liveability of the city.

Disaster management response and recovery separate charge

The Disaster Management Response and Recovery Separate Charge of **$10.00** will be applied equally to all rateable land within the city. The funds raised will be expended for the purpose of assisting Council in meeting its obligations in times of disaster, including contributing to the costs of recovery after an event, and contribute towards the ongoing operation of disaster preparedness facilities.

9.1.4 Water utility charges – potable (drinking) water

Residential pricing

Two-part charge pricing will apply to all residential property within the city (including residential vacant land) that is connected or has access to Council's water transportation system.

The two-part charge will be composed of:

(a) a water access charge, representing a contribution to the capital cost and ongoing maintenance of Council's supply infrastructure; and

(b) a water usage charge, namely a single tier charge for each kilolitre of water consumed.

Where, in a community titles scheme supplied by a master meter some lots, but not all, are residential lots (Council Land Use Code 10, 12, 14, 15, 26 and 66), all the lots within the scheme will be levied as residential lots unless the majority of the lots within the scheme, based on contribution schedule lot entitlement, are non-residential.

Non-residential pricing

Two-part charge pricing will apply to all non-residential properties within the city (including commercial vacant land) that is connected or has access to Council's water transportation system.

The two-part charge will be composed of:

(a) a water access charge, representing a contribution to the capital cost and ongoing maintenance of Council's supply infrastructure; and

(b) a water usage charge, namely a single tier charge for each kilolitre of water consumed.

For non-residential properties (including any multi-unit residential properties or buildings not the subject of a community titles scheme and the supplied lot in the scheme created under the Sanctuary Cove Resort Act) the water access charge will be based on the cross-sectional area of water services/s supplying the property or premises.

As a result of the Queensland government water reform, Council no longer owns bulk water supply and transport assets and must purchase bulk water from the State. The water usage charge that Council levies is inclusive of the bulk water price.

Table 1 – Potable (Drinking) Water Utility Charges

Land	Utility Charge
Land that is: (a) the subject of a Residential Use; and (b) not in a Prescribed Community Titles Scheme; and (c) not in the Sanctuary Cove Scheme.	A utility charge comprising: (a) an annual water access charge of $307.00; calculated and applied as a daily charge of $0.8410; and (b) a water usage charge of $4.980 per kilolitre (inclusive of $3.517 per kilolitre Bulk Component).
Land that is: (a) the subject of a Residential Use; and (b) in a Prescribed Community Titles Scheme established before 1 January 2008; and (c) not land in the Sanctuary Cove Scheme.	A utility charge comprising: (a) an annual water access charge of: i $307.00, calculated and applied as a daily charge of $0.8410 for each lot in a Prescribed Community Titles Scheme (other than lots of less than 61 square metres used for aged care/nursing home purposes); or ii $153.50, calculated and applied as a daily charge of $0.4205, for each lot less than 61 square metres in a Prescribed Community Titles Scheme used for aged care/nursing home purposes; and (b) a water usage charge of $4.980 per kilolitre (inclusive of $3.517 per kilolitre Bulk Component) in relation to the Prescribed Community Titles Scheme land apportioned either: i on the basis of the contribution schedule lot entitlements of the Prescribed Community Titles Scheme; or ii in accordance with an agreement between the body corporate of the Prescribed Community Titles Scheme and Council made under Council's Water Sub-Metering and Billing for Community Titles Scheme Properties Policy.

Land	Utility Charge
Land that is: (a) the subject of a Residential Use; and (b) in a Prescribed Community Titles Scheme established after 1 January 2008; and (c) not land in the Sanctuary Cove Scheme.	A utility charge comprising: (a) an annual water access charge of: i $307.00, calculated and applied as a daily charge of $0.8410, for each lot in a Prescribed Community Titles Scheme (other than lots of less than 61 square metres used for aged care/nursing home purposes); or ii $153.50, calculated and applied as a daily charge of $0.4205 for each lot less than 61 square metres in a Prescribed Community Titles Scheme used for aged care/nursing home purposes; and (b) a water usage charge of $4.980 per kilolitre (inclusive of $3.517 per kilolitre Bulk Component) as measured by the sub-meter for each lot in the Prescribed Community Titles Scheme; and (c) a water usage charge of $4.980 per kilolitre (inclusive of $3.517 per kilolitre Bulk Component) by the common property for the Prescribed Community Titles Scheme that is: i measured by the sub-meter/s for the common property of the Prescribed Community Titles Scheme; and/or ii calculated as the difference between the sub-meters and the master meter for the Prescribed Community Titles Scheme where the common property is not separately metered; and iii charged to the body corporate for the Prescribed Community Titles Scheme in accordance with Council's Water Sub-Metering and Billing for Community Titles Scheme Properties Policy.

Land	Utility Charge
Land that is: (a) not the subject of a Residential Use; and (b) not in a Prescribed Community Titles Scheme; and (c) not land in the Sanctuary Cove Scheme.	A utility charge comprising: (a) an annual water access charge calculated as the sum of $307.00 (calculated and applied as a daily charge of $0.8410) multiplied by the Meter Capacity Factor of each water meter supplying potable (drinking) water to the land; and (b) a water usage charge of $4.980 per kilolitre (inclusive of $3.517 per kilolitre Bulk Component).
Land that is: (a) not the subject of a Residential Use; and (b) in a Prescribed Community Titles Scheme established before 1 January 2008; and (c) not land in the Sanctuary Cove Scheme.	A utility charge comprising: (a) an annual water access charge for each lot in the Prescribed Community Titles Scheme (other than garage and storage lots) that is: i a minimum of $307.00 per lot; ii calculated as the sum of $307.00 (calculated and applied as a daily charge of $0.8410) multiplied by the Meter Capacity Factor of each water meter supplying potable (drinking) water to the Prescribed Community Titles Scheme; and iii apportioned on the basis of the contribution schedule lot entitlements of the Prescribed Community Titles Scheme; and (b) a water usage charge of $4.980 per kilolitre (inclusive of $3.517 per kilolitre Bulk Component) in relation to the Prescribed Community Titles Scheme land apportioned either: i on the basis of the contribution schedule lot entitlements of the Prescribed Community Titles Scheme; or ii in accordance with an agreement between the body corporate of the Prescribed Community Titles Scheme and Council made under Council's Water Sub-Metering and Billing for Community Titles Scheme Properties Policy.

Land	Utility Charge
Land that is: (a) not the subject of a Residential Use; and (b) in a Prescribed Community Titles Scheme established after 1 January 2008; and (c) not land in the Sanctuary Cove Scheme.	A utility charge comprising: (a) an annual water access charge for each lot in the Prescribed Community Titles Scheme (other than garage and storage lots) that is: i a minimum of $307.00 per lot; ii calculated as the sum of $307.00 (calculated and applied as a daily charge of $0.8410) multiplied by the Meter Capacity Factor of each water meter supplying potable (drinking) water to the Prescribed Community Titles Scheme land; and iii apportioned on the basis of the contribution schedule lot entitlements of the Prescribed Community Titles Scheme; and (b) a water usage charge of $4.980 per kilolitre (inclusive of $3.517 per kilolitre Bulk Component) as measured by the sub-meter for each lot in the Prescribed Community Titles Scheme; and (c) a water usage charge of $4.980 per kilolitre (inclusive of $3.517 per kilolitre Bulk Component) by the common property for the Prescribed Community Titles Scheme that is: i measured by the sub-meter/s for the common property; and/or ii calculated as the difference between the sub-meters and the master meter where the common property is not separately metered; and iii charged to the body corporate for the Prescribed Community Titles Scheme in accordance with Council's Water Sub-Metering and Billing for Community Titles Scheme Properties Policy.

Land	Utility Charge
Land that is: (a) a Mini Commercial Lot; and (b) in a Prescribed Community Titles Scheme established before 1 January 2008; and (c) not land in the Sanctuary Cove Scheme.	A utility charge comprising: (a) an annual water access charge of $153.50, calculated and applied as a daily charge of $0.4205, for each Mini Commercial Lot fewer than 21 square metres in the Prescribed Community Titles Scheme; and (b) a water usage charge of $4.980 per kilolitre (inclusive of $3.517 per kilolitre Bulk Component) in relation to the Prescribed Community Titles Scheme land during the Prescribed Period apportioned either: i on the basis of the contribution schedule lot entitlements of the Prescribed Community Titles Scheme; or ii in accordance with an agreement between the body corporate of the Prescribed Community Titles Scheme and Council made under Council's Water Sub-Metering and Billing for Community Titles Scheme Properties Policy.
Land that is: (a) a Mini Commercial Lot; and (b) in a Prescribed Community Titles Scheme established after 1 January 2008; and (c) not land in the Sanctuary Cove Scheme.	A utility charge comprising: (a) an annual water access charge of $153.50, calculated and applied as a daily charge of $0.4205, for each Mini Commercial Lot fewer than 21 square metres in the Prescribed Community Titles Scheme; and (b) a water usage charge of $4.980 per kilolitre (inclusive of $3.517 per kilolitre Bulk Component) as measured by the sub-meter for each Mini Commercial Lot in the Community Titles Scheme; and (c) a water usage charge of $4.980 per kilolitre (inclusive of $3.517 per kilolitre Bulk Component) by the common property for the Prescribed Community Titles Scheme that is: i measured by the sub-meter/s for the common property; and/or ii calculated as the difference between the sub-meters and the master meter where the common property is not separately metered; and iii charged to the body corporate for the Prescribed Community Titles Scheme in accordance with Council's Water Sub-Metering and Billing for Community Titles Scheme Properties Policy.

Land	Utility Charge
Land that is: (a) a Marina Berth Lot; and (b) in a Prescribed Community Titles Scheme established before 1 January 2008; and (c) not land in the Sanctuary Cove Scheme.	A utility charge comprising: (a) an annual water access charge for each Marina Berth Lot in the Prescribed Community Titles Scheme that is: i calculated as the sum of $307.00 (calculated and applied as a daily charge of $0.8410) multiplied by the Meter Capacity Factor of each water meter supplying potable (drinking) water to the Prescribed Community Titles Scheme land; and ii apportioned on the basis of the contribution schedule lot entitlements of the Prescribed Community Titles Scheme; and (b) a water usage charge of $4.980 per kilolitre (inclusive of $3.517 per kilolitre Bulk Component) in relation to the Prescribed Community Titles Scheme land during the Prescribed Period apportioned either: i on the basis of the contribution schedule lot entitlements of the Prescribed Community Titles Scheme; or ii in accordance with an agreement between the body corporate of the Prescribed Community Titles Scheme and Council made under Council's Water Sub-Metering and Billing for Community Titles Scheme Properties Policy.

Land	Utility Charge
Land that is: (a) a Marina Berth Lot; and (b) in a Prescribed Community Titles Scheme established after 1 January 2008; and (c) not land in the Sanctuary Cove Scheme.	A utility charge comprising: (a) an annual water access charge for each Marina Berth Lot in the Prescribed Community Titles Scheme that is: i calculated as the sum of $307.00 (calculated and applied as a daily charge of $0.8410) multiplied by the Meter Capacity Factor of each water meter supplying potable (drinking) water to the Prescribed Community Titles Scheme; and ii apportioned on the basis of the contribution schedule lot entitlements of the Prescribed Community Titles Scheme; and (b) a water usage charge of $4.980 per kilolitre (inclusive of $3.517 per kilolitre Bulk Component) of potable (drinking) water consumed as measured by the sub-meter for each Marina Berth Lot in the Community Titles Scheme; and (c) a water usage charge of $4.980 per kilolitre (inclusive of $3.517 per kilolitre Bulk Component) by the common property for the Prescribed Community Title Scheme that is: i measured by the sub-meter/s for the common property; and/or ii calculated as the difference between the sub-meters and the master meter where the common property is not separately metered; and iii charged to the body corporate for the Prescribed Community Titles Scheme in accordance with Council's Water Sub-Metering and Billing for Community Titles Scheme Properties Policy.
Land that is the supplied lot in the Sanctuary Cove Scheme.	A utility charge comprising: (a) an annual water access charge calculated as the sum of $307.00 (calculated and applied as a daily charge of $0.8410) multiplied by the Meter Capacity Factor of each water meter supplying potable (drinking) water to the supplied lot; and (b) a water usage charge of $4.980 per kilolitre (inclusive of $3.517 per kilolitre Bulk Component).

Land	Utility Charge
Land that is: (a) the supplied lot in a joint supply arrangement; and (b) not in the Sanctuary Cove Scheme.	A utility charge comprising: (a) an annual water access charge calculated as the sum of $307.00 (calculated and applied as a daily charge of $0.8410) multiplied by the Meter Capacity Factor of each water meter supplying potable (drinking) water to the supplied lot; and (b) a water usage charge of $4.980 per kilolitre (inclusive of $3.517 per kilolitre Bulk Component).
Land that is: (a) residential vacant land; and (b) not in the Sanctuary Cove Scheme.	A utility charge comprising: (a) for each parcel of land, an annual water access charge of $307.00, calculated and applied as a daily charge of $0.8410 and (b) if a water meter is connected to the parcel of land, a water usage charge of $4.980 per kilolitre (inclusive of $3.517 per kilolitre Bulk Component).
Land that is: (a) commercial vacant land (b) not in the Sanctuary Cove Scheme.	A utility charge comprising: (a) an annual access charge of $307.00 (calculated and applied as a daily charge of $0.8410) multiplied by the Meter Capacity Factor of each water meter supplying potable (drinking) water to the supplied lot; and (b) if a water meter is connected to the parcel of land, a water usage charge of $4.980 per kilolitre (inclusive of $3.517 per kilolitre Bulk Component).

9.1.5 Water utility charges – non-drinking water (Pimpama-Coomera dual reticulation area)

A non-drinking water usage charge will be levied for the supply of Non-Drinking Water to properties in the Pimpama-Coomera Dual Reticulation Area, namely a single tier charge for each kilolitre of Non-Drinking Water consumed. No water access charge will apply for this service.

Table 2 – Non-drinking Water Utility Charges – (Pimpama-Coomera Dual Reticulation Area)

Land	Utility Charge
Land that is: (a) the subject of a Residential Use; and (b) not in a Prescribed Community Titles Scheme; and (c) not land in the Sanctuary Cove Scheme.	A non-drinking water usage charge of $3.450 per kilolitre of non-drinking water consumed.
Land that is: (a) the subject of a Residential Use; and (b) in a Prescribed Community Titles Scheme established before 1 January 2008; and (c) not land in the Sanctuary Cove Scheme.	A non-drinking water usage charge of $3.450 per kilolitre of non-drinking water consumed in relation to the Prescribed Community Titles Scheme land apportioned either: (a) on the basis of the contribution schedule lot entitlements of the Prescribed Community Titles Scheme; or (b) in accordance with an agreement between the body corporate of the Prescribed Community Titles Scheme and Council made under Council's Water Sub-Metering and Billing for Community Titles Scheme Properties Policy.
Land that is: (a) the subject of a Residential Use; and (b) in a Prescribed Community Titles Scheme established after 1 January 2008; and (c) not land in the Sanctuary Cove Scheme.	(a) A non-drinking water usage charge of $3.450 per kilolitre of non-drinking water consumed as measured by the sub-meter for each lot in the Prescribed Community Titles Scheme; and (b) A non-drinking water usage charge of $3.450 per kilolitre of non-drinking water consumed by the common property for the Prescribed Community Titles Scheme that is: i measured by the sub-meter/s for the common property of the Prescribed Community Titles Scheme; and/or ii calculated as the difference between the sub-meters and the master meter for the Prescribed Community Titles Scheme where the common property is not separately metered; and iii charged to the body corporate for the Prescribed Community Titles Scheme in accordance with Council's Water Sub-Metering and Billing for Community Titles Scheme Properties Policy.

Land	Utility Charge
Land that is: (a) not the subject of a Residential Use; and (b) not in a Prescribed Community Titles Scheme; and (c) not land in the Sanctuary Cove Scheme.	A non-drinking water usage of $3.450 per kilolitre of non-drinking water consumed.
Land that is: (a) not the subject of a Residential Use; and (b) in a Prescribed Community Titles Scheme established before 1 January 2008; and (c) not land in the Sanctuary Cove Scheme.	(a) A non-drinking water usage charge of $3.450 per kilolitre of non-drinking water consumed in relation to the Prescribed Community Titles Scheme land apportioned either: i on the basis of the contribution schedule lot entitlements of the Prescribed Community Title Scheme; or ii in accordance with an agreement between the body corporate of the Prescribed Community Titles Scheme and Council made under Council's Water Sub-Metering and Billing for Community Titles Scheme Properties Policy.
Land that is: (a) not the subject of a Residential Use; and (b) in a Prescribed Community Titles Scheme established after 1 January 2008; and (c) not land in the Sanctuary Cove Scheme.	(a) A non-drinking water usage charge of $3.450 per kilolitre of non-drinking water consumed as measured by the sub-meter for each lot in the Prescribed Community Titles Scheme; and (b) A non-drinking water usage charge of $3.450 per kilolitre of non-drinking water consumed by the common property for the Prescribed Community Titles Scheme that is: i measured by the sub-meter/s for the common property; and/or ii calculated as the difference between the sub-meters and the master meter where the common property is not separately metered; and iii charged to the body corporate for the Prescribed Community Titles Scheme in accordance with Council's Water Sub-Metering and Billing for Community Titles Scheme Properties Policy.

9.1.6 Water utility charges – raw (untreated) water

A water usage charge will be levied for the supply of Raw (Untreated) Water limited to those properties currently receiving that service, namely a single tier charge for each kilolitre of Raw (Untreated) Water consumed. No water access charge will apply for this service.

Table 3 – Raw (Untreated) Water Utility Charges – (Limited to those properties nominated in the table below)

Land	Utility Charge
Land that is described as follows: Lot 3 RP192093 Lot 4 RP183397 Lot 14 RP192093 Lot 15 RP192093 Lot 16 RP201059 Lot 17 RP201059 Lot 21 RP194797 Lot 22 RP194797 Lot 2 RP183397 Lot 1 RP129327 Lot 1 RP198903 Lot 1 RP169889 Lot 0 SP276060 Lot 1 SP276060 Lot 2 SP276060 Lot 19 RP138232 Lot 18 RP138232 Lot 2 RP211841 Lot 1 RP137972 Lot 1 RP844804 Lot 3 RP134048	A water usage charge of $1.01 per kilolitre of Raw (Untreated) Water consumed for the lands listed in Column 1 which Council has permitted to remain connected to a main carrying raw water.

9.1.7 Water utility charges – non-drinking water

A water usage charge will be levied for the supply of Non-Drinking Water (Recycled) to those properties currently receiving that service and properties connected in the future in the southern and central schemes, namely a single tier charge for each kilolitre of Non-Drinking Water (Recycled) consumed. No water access charge will apply for this service.

All charges will accord with the Resolutions of Rates and Charges.

Table 4 – Non-drinking Water Utility Charges

<table>
<tr><th>Land</th><th>Utility Charge</th></tr>
<tr><td>Lands supplied either Class C Recycled Water or Class A Recycled Water.</td><td>
(a) A water usage charge of $0.050 per kilolitre for Class C Recycled Water.
(b) Subject to paragraph (c), a water usage charge of $0.618 per kilolitre for Class A Recycled Water.
(c) If the supply of recycled water to particular Land transitions from Class C Recycled Water to Class A Recycled Water on or after 1 July 2023, then the water usage charge for Class A Recycled Water to the Land will be calculated at the percentage of the water usage charge specified in paragraph (b) for the periods specified in the following table:
<table>
<tr><th>Charging Period</th><th>% of water usage charge</th></tr>
<tr><td>Period commencing on the date the Customer first takes Class A Recycled Water on the Land to the end of that financial year (first financial year)
(Note: for the avoidance of doubt, the first Charging Period may be fewer than 12 months if first supply of Class A Recycled Water occurs after 1 July in the year of commencement)</td><td>20%</td></tr>
<tr><td>12 month period commencing on the first day of the second financial year</td><td>40%</td></tr>
<tr><td>12 month period commencing on the first day of the third financial year</td><td>60%</td></tr>
<tr><td>12 month period commencing on the first day of the fourth financial year</td><td>80%</td></tr>
</table>
</td></tr>
</table>

9.1.8 Water utility charges – non-drinking water (Northern supply scheme)

A non-drinking water usage charge will be levied for the supply of Non-Drinking Water to properties in the northern supply scheme area, namely a single tier charge for each kilolitre of Non-Drinking Water consumed. No water access charge will apply for this service.

Table 5 – Non-drinking Water Utility Charges (Northern Supply Scheme) - (Limited to those properties nominated in the table below)

Land	Utility Charge
Land that is described as follows: Lot 3 RP137856 Lot 40 SP204792 Lot 2 WD3160 Lot 22 SP329480 Lot 9 RP6845 P01 Lot 401 WD6182	A water usage charge of $3.517 per kilolitre of Non-drinking Water consumed for the lands listed in Column 1, under the conditions of individual Supply Agreements.

Notes forming part of, and for the purposes of applying water charges in, Tables 1, 2, 3, 4 and 5:

(a) Where a lot in a Prescribed Community Titles Scheme has a Residential Use then:

i where the majority of the lots in the Prescribed Community Titles Scheme have a Residential Use (Council Land Use 12, 14 and 26) based on contribution schedule lot entitlements then all the lots in the Prescribed Community Titles Scheme will be levied a utility charge as if they were a Residential Use; and

ii where the majority of the lots in the Prescribed Community Titles Scheme do not have a Residential Use (Council Land Use 12, 14 and 26) based on contribution schedule lot entitlements then all the lots in the Prescribed Community Titles Scheme will be levied a utility charge as if they do not have a Residential Use.

(b) No separate annual water access charge will be levied in respect of a storage lot or garage lot where such lot is registered as a separate lot in a community titles scheme and is associated, by ownership , with another lot in the same community titles scheme that is NOT a storage lot or garage lot, or in the case of a pump site lease issued by the State, or in the case of a marina berth where such lot is associated, by ownership, with another lot that is not a marina berth.

(c) No separate annual water access charge will be levied in respect of lots defined as un-associated Storage cages and garages (Council Land Use Code 92).

(d) Where an improvement exists upon two or more lots in a manner that renders it physically impossible for the owners to dispose of part as a regulation sized lot, it shall be regarded as one lot for the purpose of the application of the water access charge.

(e) Where a whole residential duplex is solely owner/occupied as a single unit dwelling, then only one annual residential water access charge shall apply.

(f) Where the use or occupation of any lot changes during the year adjustments shall be made on a pro-rata basis from the date of change unless otherwise

Notes forming part of, and for the purposes of applying water charges in, Tables 1, 2, 3, 4 and 5:

specified.

(g) Where land is subdivided, adjustments of water access charges shall be made on a pro-rata basis from the date of registration of the plan of subdivision.

(h) Where a joint water service arrangement exists between two or more entities (other than for the Sanctuary Cove Scheme) the supplied lot shall be levied the applicable water service charges reflecting the use of the supplied lot unless determined otherwise on a case by case basis.

(i) Without limiting note (h), where a multi-unit residential lot or commercial lot ("the premises") would be subject to non-residential water pricing, were it not for the fact that the supply of water to the premises is not measurable in a manner to allow Council to apply non-residential water pricing, that the premises be subject to the levy of a water access charge (residential or non-residential, whichever is applicable) for each separate Sole Occupancy contained within the premises, as if each Sole Occupancy was a separate rateable lot.

(j) Metered or unmetered Fire Services that are 40mm or larger will be adjusted to the 40mm water meter size. Metered or unmetered Fire Services that are smaller than 40mm will be adjusted to the 20mm water meter size.

Note: For the period from the last read date (4R) for the 2025-26 financial year to 30 June 2026, the water consumed, in the absence of an actual meter read on 30 June, will be calculated by dividing the actual volume of water consumed for the period ending at the first quarter read date (1R) after 30 June and commencing the last read date (4R) of the current financial year by the number of days in the period (provides an estimated notional daily supply rate over the period) multiplied by the number of days since the last read date (4R) of the current financial year up to 30 June.

Definitions forming part of, and for the purposes of applying water charges in, Tables 1, 2, 3, 4 and 5:

"Actual Water Meter Size" means the actual water meter size.

"Assessed Water Meter Size" means:

(a) An assessed meter size can only be applied to a meter providing a combined water service. This refers to a single meter that supplies both standard non-residential water services and firefighting equipment consisting of more than one fire hose reel.

(b) An assessed meter size can only be obtained from the results of a hydraulic assessment carried out by a QBCC licence holder with a licence class of hydraulic design or a RPEQ engineer. This assessment must detail the individual meter sizes that would be required to separately supply the two service types.

(c) The assessed meter size is the meter size required to service the standard non-residential water services, as detailed in the hydraulic report.

(d) For meters greater than 40mm, the minimum assessed meter size is 40mm.

Definitions forming part of, and for the purposes of applying water charges in, Tables 1, 2, 3, 4 and 5:

"Commercial Vacant Land" means a land use noted in Council's land use records recorded at a property level (i.e. more than one parcel of land may be linked to a rate account, and each will have a land use recorded as will the rate account), that is:

(a) 02 Vacant land, Council owned or intended occupation;

(b) 03 Vacant land, State owned or intended occupation;

(c) 04 Vacant land, Commonwealth owned or intended occupation;

(d) 08 Vacant land, commercial use under planning scheme.

"Meter Capacity Factor" means a charging factor in the following table based on the cross-sectional area of a water meter compared to the cross-sectional area of a 20mm water meter. Unless a meter has been verified as an assessed meter, then the actual meter size will be used to derive the Meter Capacity Factor:-

Water Meter Size (Assessed/Actual)	Meter Capacity Factor
20mm	1.00
25mm	1.00
32mm	2.56
40mm	4.00
50mm	6.25
100mm	25.00
150mm	56.25
200mm	100.00
250mm	156.25
300mm	225.00

Definitions forming part of, and for the purposes of applying water charges in, Tables 1, 2, 3, 4 and 5:
"Mini Commercial Lot" means a land use noted in Council's land use records recorded at rate account level (i.e. more than one lot may be linked to a rate account, and each will have a land use recorded as will the rate account), that is: 25 Commercial premise that is a community titles lot, less than 21m^2.
"Prescribed Community Titles Scheme" means a community titles scheme where the supply of water to the lots and common property: (a) is not separately measured; or (b) is separately measured but the lots and common property are not separately charged; or (c) is separately measured and the lots and common property are separately charged.
"Residential Use" means a land use noted in Council's land use records recorded at rate account level (i.e. more than one property may be linked to a rate account, and each will have a land use recorded as will the rate account), that is: (a) 10 Room in a welfare institution that is a community titles lot, fewer than 62m^2; (b) 15 Room in a welfare institution that is a community titles lot more than 61m^2; (c) 11 Single dwelling house; (d) 12 Single residential unit that is a community titles lot (e) 14 Single dwelling house that is a community titles lot (f) 26 Hotel room/s that is a community titles lot (g) 66 Terrace home/ semi-detached property.
"Residential Vacant Land" means a land use noted in Council's land use records recorded at a property level (i.e. more than one parcel of land may be linked to a rate account, and each will have a land use recorded as will the rate account), that is: (a) 01 Vacant land, residential use under planning scheme; (b) 07 Vacant land that is a community titles lot, residential use under planning scheme.
"Sanctuary Cove Scheme" means the subdivisional scheme created under the *Sanctuary Cove Resort Act*.
"Sole Occupancy" means a room or other part of a building or development for occupation by one or a joint owner, lessee, tenant, or other occupier to the exclusion of any other owner, lessee, tenant, or other occupier. For example, a dwelling or room within a resort not separately titled.

Definitions forming part of, and for the purposes of applying water charges in, Tables 1, 2, 3, 4 and 5:
"Water Usage (Consumption)" means: (a) the water consumed by a water meter over the whole of the Previous Year period (i.e. commencing with the 1R read and ending with the 4R read) (b) where the water consumed by a water meter over the whole of the Previous Year period is not known, the extrapolation of a known water consumption for a continuous 90 day or greater period within the Previous Year period will apply.

9.1.9 Sewerage utility charges

Residential pricing

A sewerage access charge, representing a contribution to the capital cost and ongoing maintenance of Council's supply infrastructure, will apply to each individual residential property (including residential vacant land) that is connected or has access to Council's sewerage transportation and treatment system.

Non-residential pricing

Two-part charge pricing will apply to each individual non-residential property (including commercial vacant land and the supplied lot in the scheme created under the *Sanctuary Cove Resort Act*) that is connected or has access to Council's sewerage transportation and treatment system.

The two-part charge will be composed of:

(a) a fixed sewerage access charge, representing a contribution to the capital cost and ongoing maintenance of Council's supply infrastructure; and

(b) a sewage discharge volumetric charge, namely a single tier charge for each kilolitre of sewage deemed to have been discharged into Council's sewerage transportation and treatment system.

In determining the sewage volume discharged from a non-residential property into the sewerage system, Council will apply an industry discharge factor to the water consumed at the property as measured by the water meter/s. The discharge factor represents sewage that leaves the property as a percentage of the water used at the property. The deemed sewage volume is reduced by an allowance to cover the domestic strength sewage discharge component.

In addition to the above, Council will impose trade waste quality charges where the sewage discharged from the property exceeds the strength described in Gold Coast Water's Sewer Admission Standards.

All charges will accord with the Resolution of Rates and Charges.

From 1 July 2019 Council commenced issuing rate notices for water and sewerage utility charges on a rolling basis (that is, as water meters are being read). The fixed access charges for both water and sewerage services will be applied in arrears as a pro-rata daily rate based on the actual number of days between the meter reading dates.

Table 1 – Sewerage Utility Charges

Land	Utility Charge
Land that is: (a) the subject of a Residential Use; and (b) not in a Prescribed Community Titles Scheme; and (c) not land in the Sanctuary Cove Scheme.	A utility charge of an amount not more than the "Maximum Residential Charge" comprising: (a) an annual sewerage access charge of $783.00 calculated and applied as a daily charge of $2.1452 and (b) a sewage volume charge of $5.502 per kilolitre of Sewage Discharged.
Land that is: (a) the subject of a Residential Use; and (b) in a Prescribed Community Titles Scheme; and (c) not land in the Sanctuary Cove Scheme.	A utility charge of an amount not more than the "Maximum Residential Charge" comprising: (a) an annual sewerage access charge of: i $783.00, calculated and applied as a daily charge of $2.1452, for each lot (other than lots of fewer than 61 square metres used for aged care/nursing home purposes); or ii $391.50, calculated and applied as a daily charge of $1.0726, for each lot fewer than 61 square metres in a Prescribed Community Titles Scheme used for aged care/nursing home purposes; and (b) a sewage volume charge of $5.502 per kilolitre of Sewage Discharged from the Prescribed Community Titles Scheme apportioned either: i on the basis of the contribution schedule lot entitlements of the Prescribed Community Titles Scheme; or ii in accordance with an agreement between the body corporate of the Prescribed Community Titles Scheme and the Council.
Land that is: (a) not the subject of a Residential Use; and (b) not in a Prescribed Community Titles Scheme; and (c) not land in the Sanctuary Cove Scheme.	A utility charge of an amount comprising: (a) an annual access charge of $783.00, calculated and applied as a daily charge of $2.1452; and (b) a sewage volume charge of $5.502 per kilolitre of Sewage Discharged.

Land	Utility Charge
Land that is: (a) not the subject of a Residential Use; and (b) in a Prescribed Community Titles Scheme established before 1 January 2008; and (c) not land in the Sanctuary Cove Scheme.	A utility charge of an amount comprising: (a) an annual sewerage access charge for each lot of $783.00, calculated and applied as a daily charge of $2.1452; and (b) a sewage volume charge of $5.502 per kilolitre of Sewage Discharged from the Prescribed Community Titles Scheme apportioned either: i on the basis of the contribution schedule lot entitlements of the Prescribed Community Titles Scheme; or ii in accordance with an agreement between the body corporate of the Prescribed Community Titles Scheme and the Council.
Land that is: (a) not the subject of a Residential Use; and (b) in a Prescribed Community Titles Scheme established after 1 January 2008; and (c) not land in the Sanctuary Cove Scheme.	A utility charge of an amount comprising: (a) an annual sewerage access charge for each lot of $783.00, calculated and applied as a daily charge of $2.1452; and (b) a sewage volume charge of $5.502 per kilolitre of Sewage Discharged from each lot in the Prescribed Community Titles Scheme; and (c) a sewage volume charge of $5.502 per kilolitre of Sewage Discharged from the common property; and (d) charged to the body corporate of the Prescribed Community Titles Scheme in accordance with Council's Water Sub-Metering and Billing for Community Titles Scheme Properties Policy.
Land that is the supplied lot for the Sanctuary Cove Scheme.	A utility charge of an amount comprising: (a) an annual sewerage access charge of $783.00 calculated and applied as a daily charge of $2.1452; and (b) a sewage volume charge of $5.502 per kilolitre of Sewage Discharged.
Land that is: (a) the supplied lot in a joint supply arrangement; and (b) not land in the Sanctuary Cove Scheme.	A utility charge of an amount comprising: (a) an annual sewerage access charge of $783.00, calculated and applied as a daily charge of $2.1452; and (b) a sewage volume charge of $5.502 per kilolitre of Sewage Discharged.

Land	Utility Charge
Land that is: (a) Residential Vacant Land; and (b) not land in the Sanctuary Cove Scheme.	A utility charge of an amount not more than the “Maximum Residential Charge” comprising: **(a)** an annual sewerage access charge of $783.00, calculated and applied as a daily charge of $2.1452; and **(b)** a sewage volume charge of $5.502 per kilolitre of Sewage Discharged.
Land that is: (a) Commercial Vacant Land; and (b) not land in the Sanctuary Cove Scheme.	A utility charge of an amount comprising: (a) an annual sewerage access charge of $783.00, calculated and applied as a daily charge of $2.1452; and (b) a sewage volume charge of $5.502 per kilolitre of Sewage Discharged.
Land that is: (a) a Marina Berth Lot; and (b) in a Prescribed Community Titles Scheme established before 1 January 2008; and (c) not land in the Sanctuary Cove Scheme.	A utility charge of an amount comprising: (a) an annual sewerage access charge for each Marina Berth Lot in the Prescribed Community Titles Scheme that is: i calculated as the annual access charge of $783.00, to the Prescribed Community Titles Scheme, calculated and applied as a daily charge of $2.1452; and ii apportioned on the basis of the contribution schedule lot entitlements of the Prescribed Community Titles Scheme; and (b) a sewage volume charge of $5.502 per kilolitre of Sewage Discharged from the Prescribed Community Titles Scheme; apportioned either: i on the basis of the contribution schedule lot entitlements of the Prescribed Community Titles Scheme; or ii in accordance with an agreement between the body corporate of the Prescribed Community Titles Scheme and the Council.

Land	Utility Charge
Land that is: (a) a Marina Berth Lot; and (b) in a Prescribed Community Titles Scheme established after 1 January 2008; and (c) not land in the Sanctuary Cove Scheme.	A utility charge of an amount comprising: (a) an annual sewerage access charge for each Marina Berth Lot in the Prescribed Community Titles Scheme that is: i calculated as the annual access charge of $783.00, calculated and applied as a daily charge of $2.1452 for the Prescribed Community Titles Scheme; and ii apportioned on the basis of the contribution schedule lot entitlement of the Prescribed Community Titles Scheme; and (b) a sewage volume charge of $5.502 per kilolitre of Sewage Discharged from each Marina Berth Lot in the Prescribed Community Titles Scheme; and (c) a sewage volume charge of $5.502 per kilolitre of Sewage Discharged from the common property; and (d) charged to the Body Corporate of the Prescribed Community Titles Scheme in accordance with Council's Water Sub-Metering and Billing for Community Titles Scheme Properties Policy.

Notes forming part of, and for the purposes of applying sewerage utility charges in, Table 1 – Sewerage Utility Charges:

(a) No separate annual sewerage access charge will be levied in respect of a storage lot or garage lot where such lot is registered as a separate lot in a community titles scheme and is associated, by ownership, with another lot in the same community titles scheme that is NOT a storage lot or garage lot, or in the case of a pump site lease issued by the State, or in the case of a boat berth where such lot is associated, by ownership, with another lot that is not a boat berth.

(b) No separate annual sewerage access charges will be levied in respect of lots defined as un-associated Storage cages and garages (Council Land Use Code 92).

(c) Where an improvement exists upon two or more lots in a manner that renders it physically impossible for the owners to dispose of part as a regulation sized lot, it shall be regarded as one lot for the purpose of the application of sewerage access charges.

(d) Where a whole residential duplex is solely owner/occupied as a single unit dwelling then only one annual residential sewerage access charge shall apply.

(e) Where the use or occupation of any lot changes during the year adjustments shall be made on a pro-rata basis from the date of change unless otherwise specified.

(f) Where land is subdivided adjustments of sewerage access charges shall be made on a pro-rata basis from the date of registration of the plan.

Notes forming part of, and for the purposes of applying sewerage utility charges in, Table 1 – Sewerage Utility Charges:

(g) Where a joint water service arrangement exists between two or more entities (other than for the Sanctuary Cove Scheme) the supplied lot shall be levied the applicable sewerage access charges reflecting the use of the supplied lot unless determined otherwise on a case by case basis.

(h) Without limiting note (g), where a multi-unit residential lot or commercial lot ("the premises") would be subject to non-residential sewerage pricing, were it not for the fact that the supply of water to the premises is not measurable in a manner to allow Council to apply non-residential sewerage pricing, that the premises be subject to the levy of a sewerage access charge for each separate Sole Occupancy contained within the premises, as if each Sole Occupancy was a separate rateable lot.

Definitions forming part of, and for the purposes of calculating sewerage utility charges in, Table 1 – Sewerage Utility Charges:

"Commercial Vacant Land" means a land use noted in Council's land use records recorded at a property level (i.e. more than one property may be linked to a rate account, and each will have a land use recorded as will the rate account), that is:

(a) 02 Vacant land, Council owned or intended occupation;

(b) 03 Vacant land, State owned or intended occupation;

(c) 04 Vacant land, Commonwealth owned or intended occupation;

(d) 08 Vacant land, commercial use under planning scheme or residential development land.

"Discharge Factor" means the factor in Table 2 – Standard Discharge Factors applied to the total water usage to reduce that usage by the estimated water consumed in the use of the premises and not discharged as sewage.

"Domestic Usage Allowance" means the amount of water estimated to be consumed for domestic purposes and not discharged as sewage which:

(a) is an amount of up to 46 kilolitres per billing quarter for land which is Residential; and

(b) is an amount of up to 46 kilolitres per billing quarter for land which is not a Residential Use including a Prescribed Community Titles Scheme comprising Marina Berth Lots; and

(c) for land in a Prescribed Community Titles Scheme, other than a scheme comprising Marina Berth Lots, is up to the total of the following:-

i the number of lots which are a Residential Use multiplied by 46 kilolitres per billing quarter; and

ii the number of lots which are not a Residential Use multiplied by 46 kilolitres per billing quarter.

"Maximum Residential Charge" means the maximum utility charge per lot for sewerage services for a Residential Use that is set at $783.00, or $391.50 for each lot fewer than 61 square metres in a Prescribed Community Titles Scheme used for aged care/nursing home purposes.

Definitions forming part of, and for the purposes of calculating sewerage utility charges in, Table 1 – Sewerage Utility Charges:
"Prescribed Community Titles Scheme" means a community titles scheme where the supply of water to the lots and common property: (a) is not separately measured; or (b) is separately measured but the lots and common property are not separately charged; or (c) is separately measured and the lots and common property are separately charged.
"Residential Use" means a land use noted in Council's land use records recorded at rate account level (i.e. more than one property may be linked to a rate account, and each will have a land use recorded as will the rate account), that is: (a) 10 Room in a welfare institution that is a community titles lot, fewer than 62m^2; (b) 15 Room in a welfare institution that is a community titles lot, more than 61m^2; (c) 11 Single dwelling house; (d) 12 Single residential unit that is a community titles lot; (e) 14 Single dwelling house that is a community titles lot; (f) 26 Hotel room/s that is a community titles lot; (g) 66 Terrace home/ semi-detached property.
"Residential Vacant Land" means a land use noted in Council's land use records recorded at a property level (i.e. more than one property may be linked to a rate account, and each will have a land use recorded as will the rate account), that is: (a) 01 Vacant land, residential use under planning scheme; (b) 07 Vacant land that is a community titles lot, residential use under planning scheme.
"Sanctuary Cove Scheme" means the subdivisional scheme created under the *Sanctuary Cove Resort Act*.

Definitions forming part of, and for the purposes of calculating sewerage utility charges in, Table 1 – Sewerage Utility Charges:

"Sewage Discharged" means the amount of sewage discharged estimated as follows:

Sewage Discharged	equals	amount of water consumed	Times	Discharge Factor	minus	Domestic Usage Allowance
For the purpose of applying the Discharge Factor, where the use of land changes during the Prescribed Period adjustments shall be made from the second water meter reading in the Prescribed Period or from the commencement date of the next Prescribed Period.						

Table 2 – Standard Discharge Factors

Account Category Code	Category Description	Discharge Factor
Aged Care	Aged Care	0.80
Animal Care	Animal Care	0.70
Automotive	Automotive	0.90
Bakery	Bakeries	0.85
Bowls Club	Bowling Club	0.70
Brewery	Breweries	0.75
Butcher	Butcher & Meat processors	0.90
Caravan Park	Caravan & Mobile Home Parks	0.70

9.1.10 Sewerage (trade waste) utility charges

Sewerage (trade waste) utility charges will be levied in accordance with the following table marked “Trade Waste Utility Charges Schedule” and the additional information and definitions below about the “Load Factor Calculation”.

Trade Waste Utility Charges Schedule:

	Load Factor*				
	0	1	2	3	4
Trade Waste Charges	Standard non-residential sewage $/kL rate applies as determined by Council’s Sewerage Utility Charges resolution	Standard non-residential sewage $/kL rate applies x 1.05	Standard non-residential sewage $/kL rate applies x 1.10	Standard non-residential sewage $/kL rate applies x 1.15	Standard non-residential sewage $/kL rate applies x 1.20

*For load factors above 4, the trade waste charge is 5% for every 1 Load Factor score.

It should be noted that the load factor is a “points-based system” which factors in the additional risk, strength, infrastructure and administrative load placed on the sewerage system by sewage discharged from a property, above and beyond normal domestic sewage discharge.

For the purposes of determining the level of Trade Waste Utility Charges a customer categorisation is undertaken to determine the load factor as detailed in the following section marked “Load Factor Calculation”.

Load Factor Calculation:

LOAD FACTOR
Load factor is calculated using the following formula: Load factor = Industry group (I) + Compliance history (C)

The definitions of the load factor criteria are:

I = Industry group is a rating based on an assessment of the process producing the trade waste. Industry groups are categorised according to types of contaminants which are likely to be present in the trade waste from that industry and is based on industry standard and guidance provided by the National Water Services Association of Australia.

C = Compliance history is based on the customer's history of breaches of approval conditions, including pre-treatment pump-out, significant or ongoing breaches of the Sewer Admission Standards or any breach of the trade waste approval terms and conditions or pre-treatment guidelines.

Sewer Admission Standards:

All sewage discharged to the sewerage system shall at all times comply with the standards, unless otherwise specified in the Trade Waste Approval. The standards encompass Prohibited Substances, General Substance Limits and Controlled Substance Limits.

Any substance not listed in the table below and those listed as a prohibited discharge may not be discharged to the sewerage system. Council may request specific demonstrable evidence based on a degradability and toxicity for any substance when assessing acceptance for discharge to its sewerage system.

Table 1 – Prohibited Substances

Prohibited Substances
Flammable/explosive substances
Solid or viscous substances in a quantity, or of a size, that can obstruct the operation of City's sewerage system. Examples include but are not limited to: metal, glass, plastic, rags, ash, cinders, straw, tar, wood, grease and oil.
Radioactive substance except as allowed for under the *Queensland Radiation Safety Act 1999* and Radiation Safety Regulation 2021
Pathological and infectious waste and cytotoxic waste except as allowed for under the National Industry Code of Practice for the Management of Clinical and Related Wastes
Floodwater, rainwater, roof water, stormwater, subsoil water and surface water
Substances referred to in Schedule 1 of the *Water Supply (Safety and Reliability) Act 2008*
Genetically engineered organisms require an approval for each substance
Organic compounds and pesticides identified as prohibited in Table 3.

Table 2 – General Substances

General Substances	
All businesses should conform with these limits unless specified in their trade waste approval	**Limit (mg/L)**
Ammonia (as N)	100
Chemical Oxygen Demand (COD)	1500
Colour	100
Sodium Adsorption Ratio	<10
Conductivity us/cm	1600
Grease and oil	200
Gross Solids - non-faecal	13mm QSV<3m/hr
Non-volatile suspended solids	30
Temperature	38
Suspended solids	600
Total dissolved salt	1000
Total Kjeldahl Nitrogen (TKN) (as N)	150
Total Phosphorus (as P)	20
Non-ionic surfactants	100
Aluminium	100
Iron	10

Table 3 – Controlled Substances

Controlled Substances	Limit (mg/L)
pH	6.5-9.0
Metals	
Aluminium	100
Arsenic excluding organoarsenic compounds	0.5
Barium	5
Cadmium	1
Total chromium	3 (to a max of 9 g/day)
Cobalt	5 (to a max of 15 g/day)
Copper	5 (to a max of 15 g/day)
Iron	10
Lead	1 (to a max of 3 g/day)
Lithium	10
Manganese	10
Mercury	0.01
Molybdenum	5
Nickel	1
Selenium	1
Silver	5
Tin (excludes organotin compounds)	5
Zinc	1
Organic Compounds	
Boron (as B)	5

Controlled Substances	Limit (mg/L)
Bromine	5
Chlorine	10
Fluoride	30
Cyanide – weak and dissociable	1
Cyanide	5
Formaldehyde (as HCHO)	30
Halogenated aliphatic compounds	1
Petroleum hydrocarbons (total) (non-flammable)	30
Phenolic compounds (non-halogenated)	1
Polybrominated biphenyls	Prohibited
Polychlorinated biphenyls	Prohibited
Polynuclear aromatic hydrocarbons	5
Sulphate (as SO4)	1000
Sulphite (as SO2)	15
Sulphide – dissolved	1 (Australian methods)
Flammable substances	Prohibited
Pesticides	
Organophosphorous pesticides	Prohibited
Organoarsenic compounds	Prohibited
Organotin compounds	0.1
Organochlorine pesticides	Prohibited
Aldrin	Prohibited
Chlordane	Prohibited

Controlled Substances	Limit (mg/L)
DDT	Prohibited
Dieldrin	Prohibited
Heptaclor	Prohibited
Lindane	Prohibited

Pre-Treatment:

If required, discharges must be pre-treated to comply with requirements stated in the trade waste approval or the Sewer Admission Standards. Any plumbing or drainage work at the premises must be carried out by a licensed plumber and be verified by a compliance certificate issued by Council's Plumbing and Drainage department.

It may be necessary to install equipment to treat the trade waste before it is discharged into the sewer. For customers installing "off the shelf" devices including grease arrestors or Oily water separators, only pre-treatment products that have been approved by Council can be installed.

Specifications for these devices are detailed below.

Defective, under-sized or over-loaded pre-treatment equipment does not meet the specified pre-treatment criteria which is; the pre- treatment device must be in good working order and not over-loaded.

Grease arrestor specifications:

Grease arrestors must be sized to allow one hour retention at peak hourly flow.

Grease arrestors up to 2000 litres may receive up to an additional 10 per cent fixture loading in excess of the stated capacity of the arrestor. Grease arrestors 3000 litres and greater shall be sized to receive a minimum of 75 per cent fixture loading of the stated capacity of the arrestor.

Unless otherwise approved, all arrestors shall:

(a) not be less than 1000 litres in capacity;

(b) not be greater than 5000 litres in capacity;

(c) be vented with a 100 millimetre diameter vent;

(d) have gas tight lids;

(e) be fitted with 100 millimetre sample points on the inlet and outlet of the arrestor;

(f) have a capacity below the invert of the outlet of the arrestor at least twice the total capacity of the appliances and fixtures connected to the arrestor or, a

larger capacity if required by Council;

(g) have a distance from the top of the arrestor to the outlet that is at least half the depth of the arrestor below the outlet invert;

(h) have the outlet invert level of the arrestor at least 75 millimetres below the inlet invert level.

All pre-cast concrete grease or silt arrestors installed are to be protected by an internal acid resistant protective coating, installed during manufacture and prior to the delivery and installation of the arrestor.

All pre-treatment equipment must be installed in a suitable location allowing servicing and maintenance to be carried out in accordance with Workplace Health and Safety guidelines. Grease arrestors are ideally located externally to the building so that servicing and maintenance can be carried out easily.

Grease arrestors that need to be installed internally must be located in a suitably sealed, vermin proofed room with mechanical ventilation. The room must have external access only and be completely sealed from food preparation areas. A hose cock and remote servicing pipe must be located within the room. The door of the room must remain closed when the grease arrestor is being serviced.

Remote servicing pipes for pre-treatment equipment must be 80mm minimum diameter. The pipe inlet at the device end must be positioned above the device and be complete with a cam lock fitting. The suction end of the pipe should be easily accessible and fitted with a male cam lock fitting.

Grease arrestors installed in restricted areas must satisfy the following requirements:

- The minimum clear height above the top of the arrestor lids and the underside of the floor slab, or concrete thickening beam or any other obstruction should be 1500mm minimum for gastight screw on light duty lids and 1800mm minimum for gastight covers and frame.
- A safe working platform may be required adjacent to the arrestor to enable the gastight covers to be removed from the frame. The walkway floor of the platform should be a minimum of 2100mm clear of the underside of the floor slab, or concrete thickening beam or any other obstruction.

Oily water separators:

Each application will be assessed on the nature of the oily waste to be treated, the proposed treatment method and the site location. A minimum size 1000 litre in-ground holding tank is required prior to coalescing plate and vertical gravity separators.

The size of the oily water separation equipment will be calculated by the peak hourly flow rate through the unit.

Oily water separation and pre-treatment options include:

(a) coalescing plate separators;

(b) vertical gravity separators;

(c) membrane technology;

(d) dissolved air flotation (DAF);

(e) chemical precipitation;

(f) hydro cyclones;

(g) other approved apparatus or methods.

Compliance History:

For the 2025-26 financial year, the Compliance History rating score for input into the customer categorisation formula is as follows:

Compliance History*	C
New customer	0
No breaches of trade waste approval terms and conditions	0
Issued with a breach of trade waste approval terms and conditions in billing period (including significant breach of Sewer Admission Standards and/or failure to service pre-treatment devices)	1

* For a full description of Trade Waste categories and compliance considerations, refer to Council's Trade Waste Guidelines.

9.1.11 Waste management utility charges

(1) Waste management utility charges for domestic premises contribute to the management and operation of waste facilities and the cost of the supply of waste management services, including the storage, collection and removal (including delivery to a waste disposal facility) of, collectively, the following:-

(a) domestic waste from domestic premises; and

(b) recyclable waste from domestic premises.

(2) To facilitate the storage, collection and removal (including delivery to a waste disposal facility) of domestic waste and recyclable waste from domestic premises, the premises:-

(a) may be supplied with:-

(i) a 140 litre waste container for the collection of domestic waste; or

(ii) a 240 litre waste container for the collection of domestic waste; or

(iii) a 360 litre waste container for the collection of domestic waste; and

(b) may also be supplied with:-

(i) a 140 litre waste container for the collection of recyclable waste; or

(ii) a 240 litre waste container for the collection of recyclable waste; or

(iii) a 360 litre waste container for the collection of recyclable waste.

(3) The “base domestic collection service” comprises the supply and servicing of, collectively:-

(a) a 140 litre waste container or a 240 litre waste container for the collection of domestic waste from domestic premises serviced weekly; and

(b) a 140 litre waste container or a 240 litre waste container for the collection of recyclable waste (other than green organics) from domestic premises serviced fortnightly.

(4) The waste management utility charge for the storage, collection and removal (including delivery to a waste disposal facility) of domestic waste from domestic premises is a 2-part charge that is made up of the following parts:-

(a) Part A – a charge for services, facilities and activities directly or indirectly related to waste management, and in particular, services, facilities and activities for the storage, collection and removal (including delivery to a waste disposal facility) of domestic waste, but excluding any State waste levy cost component; and

(b) Part B – the State waste levy cost component, representing an apportionment of the waste levy payable by Council, in its capacity as the operator of levyable waste disposal sites in Council's local government area, to the State ***less*** an apportionment of the *Waste Reduction and Recycling Act* chapter 3, part 7 State annual payment for the financial year 2025-26 received, or to be received, by Council from the State applicable to domestic premises for the collection service being received.

(5) Relevantly, under the *Waste Reduction and Recycling Act*, chapter 3, part 7:-

(a) the chief executive (responsible for the administration of the Act) must make to each local government (including Council) affected by the waste levy, an annual payment as prescribed by regulation; and

(b) a local government (including Council) must use the amount paid to the local government to mitigate any direct impacts of the waste levy on households in the local government's local government area.

(6) Waste management utility charges for commercial premises:-

(a) do not include a contribution to the management and operation of waste facilities; and

(b) do not include a contribution to waste management recycling services,

because commercial premises are subject to a separate waste management utility charge for the collection and removal of recyclable waste.

(7) The waste management utility charge for the storage, collection and removal (including delivery to a waste disposal facility) of commercial waste from commercial premises is a 2-part charge that is made up of the following parts:-

(a) Part A – a charge for services, facilities and activities directly or indirectly related to waste management, and in particular, services, facilities and activities for the storage, collection and removal (including delivery to a waste disposal facility) of commercial waste, but excluding any State waste levy cost component; and

(b) Part B – the State waste levy cost component, representing an apportionment of the waste levy payable by Council, in its capacity as the operator of levyable waste disposal sites in Council's local government area, to the State.

(8) However, in relation to waste management utility services provided to a community titles scheme comprised of both domestic premises and commercial premises and (if applicable) common property that share waste container/s (for example, a bulk bin), thus commingling the domestic waste and the commercial waste, Council considers it currently has no equitably practical or systemic way to do any of the following:-

(a) identify and apportion the quantity of commercial waste to domestic waste in the commingled waste containers;

(b) from a levying perspective, identify which of the premises within the community titles scheme are domestic premises and which are commercial premises;

(c) calculate and levy an apportionment of the State waste levy cost component between the domestic premises (less an apportionment of the *Waste Reduction and Recycling Act* section chapter 3, part 7 State annual payment) and the commercial premises.

(9) For the reasons set out at paragraph 8, Council considers it appropriate that the waste management utility charge for the storage, collection and removal (including delivery to a waste disposal facility) of commingled domestic waste and commercial waste from a community titles scheme comprised of both domestic premises and commercial premises is, for each premises, the 2-part charge that is applied to domestic premises as specified in paragraph 4 above (irrespective of whether the premises are domestic premises or commercial premises).

(10) For general waste that is recyclable waste or green organics only, a Part A charge only, being a charge for services, facilities and activities directly or indirectly related to waste management, and in particular, services, facilities and activities for the storage, collection and removal (including delivery to a resource recovery area, material recovery facility or other end of waste framework facility, and delivery of any residue waste to a waste disposal facility) of recyclable waste or green organics.

(11) Pursuant to Council resolution G22.1202.052, the green organics service will be supplied to all single unit dwellings, between lot size 250m^2 and 5,000m^2 with exemptions and inclusions where approved, during 2025-26.

(12) The utility charges will be:

(a) if the utility charge is for a base domestic collection service (as defined in item 17(a) of Appendix 1 with a 240L domestic waste container, **$444.00** per annum, a 2-part charge that is made up of the following parts:

(i) Part A – a combined domestic waste and recyclable waste utility charge of **$444.00** per annum, unless otherwise specified in Item 1 of Appendix 1, comprising the sum of:

(1) Part A domestic waste utility charge, but excluding any State waste levy cost component; and

(2) Part A recyclable waste utility charge; plus

(ii) Part B – the State waste levy cost component LESS an apportionment of the *Waste Reduction and Recycling Act*, chapter 3, part 7 annual payment for the financial year 2025-26 received, or to be received, by Council from the State,

charged as an annual amount, payable in 2 instalments per annum at 6 monthly intervals, unless otherwise specified in Appendix 1;

(b) if the utility charge is for a waste collection service other than a base domestic collection service (as defined in item 17(a) of Appendix 1), a charge as specified in Appendix 1, charged as an annual amount, payable in 2 instalments per annum at 6 monthly intervals, unless otherwise specified in Appendix 1.

9.1.12 Recycling utility charges

The Recycling Utility Charge of **$12.00** will be applied to all rateable land within the city. The funds raised will be expended for the purpose of recycling initiatives, recycling infrastructure (including land) and recycling services (not funded via the Waste Management Utility Charge), which are aimed at minimising waste to landfill, in accordance with Council and State Government Waste Strategies.

9.1.13 Waste management access charge

The Waste Management Access Charge of **$160.00** will be applied to all residential lots (as that term is defined for differential rating purposes) that are not charged a waste management utility charge and are not located within either Sanctuary Cove Resort or Hope Island Resort. The purpose of this charge is to assist in defraying the cost to Council of some of its waste management services, including public place collections, management of landfills and recycling centres and processing and disposal of waste. This charge, and the waste management utility charge which Council collects from domestic and commercial premises that have access to Council's waste management collection services, assist in defraying the overall cost to Council of providing all of Council's waste management services.

9.2 Rebates and other concessions

For the 2025-26 financial year, the following rebates and concessions will be offered. Any other rate concessions not mentioned below will be in accordance with the resolutions of rates and charges or relevant Council policy.

9.2.1 Pensioner Rates Rebate – Home Owners

Subject to the conditions detailed below, a rate rebate of up to a maximum amount of **$298.00** will be granted to owner-occupiers of their principal place of residence where the owner-occupier is:

(a) a person who holds a current Queensland Veteran Gold Card (issued by the Department of Veteran's Affairs); or

(b) a person who holds a current Queensland issued Pensioner Concession Card and is receiving not less than **80%** of the full pension at time of application and thereafter.

Council will verify the continued eligibility of pensioners on at least an annual basis via Centrelink's Customer Confirmation eService; or by obtaining from the pensioner, written confirmation from the relevant Commonwealth agency. An overseas pension amount can be added to the Australian pension amount to make up the qualifying rate of pension.

The rate rebate is subject to the conditions below:

(1) An applicant must lodge an application in the form prescribed (if any) for this purpose; and must be accompanied by the supporting material prescribed for the application.

(2) The applicant must be the Owner or Life Tenant of, and permanently reside at the premises.

(3) For an applicant to be considered a Life Tenant, the life tenancy must be created under the terms of an executed will or a decision of a superior court (including the Family Court) and the will or court order must clearly demonstrate that they have not been relieved of the responsibility to pay all rates and charges levied in respect of the property.

(4) For an applicant to be considered an owner, the owner must be an "owner" as defined under the *Local Government Act*; however:

(a) an applicant may be considered an owner despite title to the property being held by or in the name of a bank, other financial institution or government department, for debt security reasons, but must permanently reside at the subject property and must clearly demonstrate that they have not been relieved of the responsibility to pay all rates and charges levied in respect of the property; or

(b) an applicant may be considered an owner if they possess the legal right (for example, pursuant to a lease) to permanently reside at the subject property and are responsible for all outlays in relation to the property, including the payment of all rates and charges.

(5) A rebate will be granted only in respect of:

(a) a private, single-unit dwelling used as the applicant‘s **permanent** residence;

(b) an individual residential lot within a community titles scheme, used exclusively as the applicant‘s **permanent** residence;

(c) a property rated as multi-dwelling residential building or multi-dwelling residential property and the applicant resides **permanently** at the property.

(6) A rebate will be granted on the following basis:

(a) All joint registered owners are eligible pensioners and jointly occupy the property: **Full Rebate**.

(b) A spousal couple (including a de facto spouse) are joint owner/occupiers of property but only one is an eligible pensioner: **Full Rebate**.

(c) In all other joint ownership cases, rebate will be granted to eligible owner occupiers on a pro-rata basis according to their ownership equity in the subject property. The only exception to this condition is where a spouse/de facto spouse provides proof in the form of a court order or other legal document that they are solely responsible for all rates and charges on a property even though their estranged spouse/de facto spouse may be registered as a joint owner of the property.

(7) A rebate will be granted for the current rating period’s rates only; however, a rebate may be granted retrospectively in exceptional circumstances at the discretion of the Chief Executive Officer or any other officer subdelegated such authority by the Chief Executive Officer.

(8) A discount, where applicable under Council’s rating resolutions, will apply to the gross rates and charges prior to rebate and subsidy amounts being deducted.

(9) A pro-rata rebate will be granted:

(a) up to and including the date of sale;

(b) on and from the date of purchase;

(c) on and from the date of grant of a qualifying level of pension subject to condition (2).

(10) An inspector's verification of information contained in any application may be obtained at any time.

9.2.2 Pensioner Rates Rebate – Non-Home Owners

Subject to the conditions detailed below, a rate rebate of up to a maximum amount of **$298.00** will be granted to **occupiers of their permanent residence under a Long Residence Arrangement** where the occupier is:

(a) a person who holds a current Queensland Veteran Gold Card (issued by the Department of Veteran's Affairs); or

(b) a person who holds a current Queensland issued Pensioner Concession Card and is receiving not less than **80%** of the full pension at time of application and thereafter.

For this part:

(a) a Long Residence Arrangement is:

(i) a lease, licence, or other occupancy entitlement, for a term not shorter than 90 years (including, for clarity, a lifetime lease or licence); or

(ii) a share in a company title scheme;

(b) a company title scheme is one under which:

(i) a company owns the property that includes the building in which the dwelling unit is contained (together with other dwelling units); and

(ii) the ownership of a share (or shares) in the company entitles the holder to occupy his/her dwelling; but

(iii) the shareholder does not acquire ownership of the dwelling itself.

(c) reference to a spouse includes a de facto spouse.

Council will verify the continued eligibility of pensioners on at least an annual basis via Centrelink's Customer Confirmation eService; or by obtaining from the pensioner, written confirmation from the relevant Commonwealth agency. An overseas pension amount can be added to the Australian pension amount to make up the qualifying rate of pension.

The rate rebate is subject to the conditions below:

(1) An applicant must lodge an application:

(a) in the form prescribed (if any) for this purpose; and

(b) accompanied by:

(i) satisfactory evidence that they occupy the property as their permanent residence under a Long Residence Arrangement; and

(ii) other supporting material prescribed for the application.

(2) The applicant and the property owner must sign an acknowledgement and undertaking:

(a) confirming the occupancy and tenure information provided by the applicant;

(b) acknowledging that the outgoings for the property (i.e. the rates component) will be reduced on the basis only that one or more pensioners occupy the property as their permanent residence;

(c) that binds the property owner to pass to the eligible occupant/s the benefit of the rebate, if the rebate concession is granted.

(3) A rebate will be granted only in respect of:

(a) a private, single-unit dwelling used as the applicant's **permanent** residence;

(b) an individual residential lot within a community titles scheme, used exclusively as the applicant's **permanent** residence;

(c) a property rated as multi-dwelling residential building or multi-dwelling residential property, at which the applicant resides **permanently**.

(4) A rebate will be granted on the following basis:

(a) All occupiers of the property are eligible pensioners: **Full Rebate**.

(b) A spousal couple are joint occupiers of property but only one is an eligible pensioner: **Full Rebate.**

(5) A rebate will be granted for the current rating period's rates only, but a rebate may be granted retrospectively in exceptional circumstances at the discretion of the Chief Executive Officer or any other officer sub-delegated such authority by the Chief Executive Officer.

(6) A discount, where applicable under Council's rating resolutions, will apply to the gross rates and charges prior to rebate and subsidy amounts being deducted.

(7) No pro-rata rebates will be granted.

9.2.3 Rates & charges – Not-for-profit organisations

Clubs, sporting associations and other not-for-profit community organisations approved by Council will be granted concessions in accordance with Council's Assistance Policy.

9.2.4 Rates & charges – Voluntary Conservation Agreements

Landowners, who are party to voluntary conservation agreements with Council, may be granted a rebate of part of the differential general rate and a 100% rebate of the Open Space including Koala Habitat, Maintenance and Enhancement separate charge in accordance with Council's Assistance Policy.

9.2.5 Water & Sewerage Charges

Rebates may be applied to Water and Sewage rates under the following policies:

(i) Concealed Water Leak Policy;

(ii) Assistance Policy.

9.2.6 Commercial charge concessions

Upon written request, eligible organisations may be entitled to a rebate of the scheduled building fee in accordance with Council's Rate Donation, Infrastructure Charges and Development Application Fee Discount Policy.

9.3 Limitations on increases in rates and charges

There have been no limitations on increases in rates and charges.

9.4 Cost-recovery fees and commercial charges

Cost-recovery fees and commercial charges fixed by Council pursuant to sections 97 and 262(3)(c) respectively of the *Local Government Act* are detailed in the "Register of Fees and Charges 2025-26".

The principles of Full Cost Pricing (National Competition Policy)* and User Pays** have been applied in calculating all cost-recovery fees of the Council where applicable. As part of the resolutions adopting the 2025-26 Budget, Council has also adopted certain cost exclusions applicable to some cost-recovery fees.

* By *Local Government Regulation* section 22:

A local government applies full cost pricing to a significant business activity by charging for goods or services at the full cost of providing the goods or services, subject to the following—

(a) the pricing provisions;

(b) the removal of any competitive advantage or disadvantage, whenever possible and appropriate;

(c) if a competitive advantage or disadvantage cannot be removed—the taking of the competitive advantage or disadvantage into account when pricing the goods or services.

A *competitive advantage* is an advantage a business entity conducting a significant business activity has over a private sector business because the local government owns the activity.

** *User pays* is a charging method premised upon a person paying for only that portion of a service that the person consumes.

Two factors must be present to enable the implementation of a user pays system for a service:

- The local government must be able to measure with some precision the total cost of providing the service to the community.
- The total cost of the service must be capable of apportionment among the users, as far as is practicable, on the basis of their individual usage of the service. This implies that the local government can measure each consumer's use of the service.

The following criteria are used for deciding the amount of the commercial charges and cost recovery fees:

i. Charges for Local Government Services and Facilities

In setting charges for local government services and facilities, where Council is the sole supplier, prices will be based on the principle of recovering the cost to Council of providing the service or facility. In some circumstances, it may be appropriate to set charges for services below full cost recovery in order to achieve social, economic or environmental goals. In making any such decision the reason for the decision will be clearly set out in the resolution together with the estimated amount of revenue to be foregone in the subject year.

Where the service or facility being supplied is one which is of 'commercial value', the charge for 'competitive services and facilities' will apply, as described below.

ii. Charges for Competitive Services and Facilities

Council will apply, as a minimum and as far as it is practicable, the principle of full cost recovery in setting charges for services and facilities that might be supplied by other parties, including community or non-profit organisations.

Council may consider charging at less than the full cost of the service/facility when it considers it appropriate to do so in order to achieve social, economic or environmental goals. In making any such decision the reason for the decision will be clearly set out in the resolution, together with the estimated amount of revenue to be foregone in the subject year.

When the service or facility supplied is of a commercial nature, then Council will consider including a 'profit' element in the charge. Such consideration will be made on a case by case basis.

iii. Charges for Significant Business Activities

The *Local Government Regulation* requires Council to consider the application of competitive neutrality principle to its Significant Business Activities (SBAs) and are defined in *Local Government Act* section 43(4) as follows

"(4) A ***significant business activity*** is a business activity of a local government that –

(a) is conducted in competition, or potential competition, with the private sector (including off street parking, quarries, sporting facilities, for example); and

(b) meets the threshold prescribed under a regulation."

Achieving competitive neutrality involves the removal of competitive advantages or disadvantages arising from a Local Government's ownership of an activity.

Council may elect to apply one of two levels of reform through adoption of:

(a) full cost pricing (which involves pricing the significant business activity on a commercial basis, but without creating a new business unit); or

(b) commercialisation which involves creating a new business unit that is part of the local government, to conduct the significant business activity on a commercial basis).

Each level of reform requires the application of Full Cost Pricing principles and the inclusion of the following costs in pricing:

- operational costs;
- administrative costs and overheads;
- return of capital (depreciation);
- return on capital; and
- competitive neutrality adjustments.

Council may decide to identify some activities that are to be provided at less than full cost in order to achieve a social, economic, environmental or other objective. In making any such decision the reason for the decision will be clearly set out in the resolution together with the estimated amount of revenue to be foregone in the subject year.

When any such decision is applied to a commercialised business unit, the direction to that unit will be recognised as a 'community service obligation' and a subsidy will be paid to that unit and that subsidy will be recognised in the accounts of that unit.

iv. Cost Recovery Fees

In setting cost recovery fees Council will recover the cost of providing the service or of taking the action for which the fee is charged. Council may resolve to recover less than the full cost to it where it considers appropriate. In making any such decision the reason for the decision will be clearly set out in the report together with the estimated amount of revenue to be foregone in the subject year.

Whilst Council notes that, pursuant to *Local Government* Act section 97 it may introduce a tax component into a regulatory fee in order to achieve a social or other objective, it is not Council's intention to encompass a tax in any regulatory fee. Accordingly, Council will not recover more than the cost of administering the regulatory regime.

Appendix 1

Appendix 1

Utility Charges for Waste Management Services 2025-26

The waste management utility charges set out in items 1 to 16 below apply to all land and structures to which a waste management service is supplied or, in the case of occupied rateable land, made available by Council.

If a 2-part waste management utility charge applies to an item, the charge is made up of the following parts:-

(a) Part A – a general service charge as set out in the table in each of items 1 to 16 below; and

(b) Part B – the State waste levy cost component as set out in the table for the item (but only if the State waste levy cost component is applicable to the item, and payable in addition to the Part A general service charge).

Relevantly, under the *Waste Reduction and Recycling Act 2011*, chapter 3, part 7:-

(a) the chief executive (responsible for the administration of the Act) must make to each local government (including Council) affected by the waste levy, an annual payment as prescribed by regulation; and

(b) a local government (including Council) must use the amount paid to the local government to mitigate any direct impacts of the waste levy on households in the local government's local government area.

Appendix 1

1. **Domestic waste container service charges (Wheelie Bin - Domestic waste collected weekly, recyclable waste collected fortnightly)**

The charges set out below apply to all occupied land and structures within the designated area for the Council of the City of Gold Coast (including premises on South Stradbroke Island).

Part A – General service charge

Particulars of Waste Container	Annual Service Charge (Part A)		
	Kerbside	Assisted Service	Wheel out Wheel back
80L Domestic Waste Container & 140/240L/360L(1) Recyclable Waste Container (Kerbside)	$ 444.00	$ -	$ -
140L Domestic Waste Container & 140/240L Recyclable Waste Container (Kerbside)	$ 444.00	$ 444.00	$ 759.64
240L Domestic Waste Container & 140/240L Recyclable Waste Container (Kerbside)	$ 444.00	$ 444.00	$ 759.64
240L Domestic Waste Container & 360L(1) Recyclable Waste Container (Kerbside)	$ 444.00	$ 444.00	$ 759.64
360L Domestic Waste Container & Recyclable Waste Container (Kerbside)	$ 763.00	$ 763.00	$ 1,579.48

(1) Upsizing to a 360L recyclable waste container will incur a one-off establishment fee

Part B – State Waste Levy cost component less an apportionment of the WRRA section 73DA and 73DB State annual payment

Particulars of Waste Container	State Waste Levy cost component (Part B) less s73DC apportionment		
	Kerbside	Assisted Service	Wheel out Wheel back
80L Domestic Waste Container (Kerbside)	$33.52 less apportionment = $0.00	$33.52 less apportionment = $0.00	$33.52 less apportionment = $0.00
140L Domestic Waste Container (Kerbside)	$58.64 less apportionment = $0.00	$58.64 less apportionment = $0.00	$58.64 less apportionment = $0.00
240L Domestic Waste Container (Kerbside)	$100.56 less apportionment = $0.00	$100.56 less apportionment = $0.00	$100.56 less apportionment = $0.00
360L Domestic Waste Container (Kerbside)	$150.86 less apportionment = $0.00	$150.86 less apportionment = $0.00	$150.86 less apportionment = $0.00

Appendix 1

2. **Additional optional domestic waste container service charges (Wheelie Bin - domestic waste collected weekly, recyclable waste collected fortnightly)**

The charges set out below apply to all occupied land and structures within the designated area for the Council of the City of Gold Coast.

Part A – General service charge

Particulars of Waste Container	Annual Service Charge (Part A)		
	Kerbside	Assisted Service	Wheel out Wheel back
140L Domestic Waste Container (Kerbside)	$ 251.52	$ 251.52	$ 503.60
240L Domestic Waste Container (Kerbside)	$ 251.52	$ 251.52	$ 503.60
360L Domestic Waste Container (Kerbside)	$ 518.72	$ 518.72	$ 1,139.40
140L/240L Recyclable Waste Container (Kerbside)	$ 64.40	$ 64.40	$ 116.48
360L Recyclable Waste Container (Kerbside)	$ 104.72	$ 104.72	$ 146.04

Part B – State Waste Levy cost component less an apportionment of the WRRA section 73DA and 73DB State annual payment

Particulars of Waste Container	State Waste Levy cost component (Part B) less s73DC apportionment		
	Kerbside	Assisted Service	Wheel out Wheel back
140L Domestic Waste Container (Kerbside)	$58.64 less apportionment = $0.00	$58.64 less apportionment = $0.00	$58.64 less apportionment = $0.00
240L Domestic Waste Container (Kerbside)	$100.56 less apportionment = $0.00	$100.56 less apportionment = $0.00	$100.56 less apportionment = $0.00
360L Domestic Waste Container (Kerbside)	$150.86 less apportionment = $0.00	$150.86 less apportionment = $0.00	$150.86 less apportionment = $0.00
140L/240L Recyclable Waste Container (Kerbside)	Not applicable	Not applicable	Not applicable
360L Recyclable Waste Container (Kerbside)	Not applicable	Not applicable	Not applicable

Note: Part B is not applicable for item 2 recyclable waste containers because recyclable waste is disposed of at a resource recovery area, material recovery facility or other end of waste framework facility.

Appendix 1

3. Domestic sustainability bundle service charges (Wheelie Bin - Domestic waste collected weekly, recyclable waste and green organics collected fortnightly)

Part A – General service charge

Particulars of Waste Container	Annual Service Charge (Part A)		
	Kerbside	Assisted Service	Wheel out Wheel back
140L Domestic Waste Container, 140L/240L/360L Recyclable Waste Container, 240L Green Organics Container (Kerbside) (1)	$ 505.52	$ 505.52	$ 821.64

(1) Upsizing to a 360L recyclable waste container will incur a one-off establishment fee

Part B – State Waste Levy cost component less an apportionment of the WRRA section 73DA and 73DB State annual payment

Particulars of Waste Container	State Waste Levy cost component (Part B) less s73DC apportionment		
	Kerbside	Assisted Service	Wheel out Wheel back
140L Domestic Waste Container (Kerbside)	$58.64 less apportionment = $0.00	$58.64 less apportionment = $0.00	$58.64 less apportionment = $0.00

4. Green organics container service charges (Wheelie Bin - Collected fortnightly)

Part A – General service charge

Particulars of Waste Container	Annual Service Charge (Part A)	
	Kerbside	Assisted Service
240L Green Organics Container (Kerbside)	$ 80.76	$ 80.76

Part B – State Waste Levy cost component

Particulars of Waste Container	State waste levy cost component (Part B)	
	Kerbside	Assisted Service
240L Green Organics Container (Kerbside)	Not applicable	Not applicable

Note: Part B is not applicable for item 4 green organics containers because green organics is disposed of at a resource recovery area, material recovery facility or other end of waste framework facility.

Appendix 1

5. Commercial waste container service charges (Wheelie Bin)

Part A – General service charge

The applicable Part A utility charge is the sum of the 'per service per week' amount specified in the below table multiplied by the number of services supplied per week to the premises.

Particulars of Waste Container	Annual service charge - per service per week
140L Commercial Waste Container (Kerbside)	$ 357.84
240L Commercial Waste Container (Kerbside)	$ 426.44
360L Commercial Waste Container (Kerbside)	$ 740.72

Part B – State Waste Levy cost component

The applicable Part B utility charge is the sum of the 'per service per week' amount specified in the below table multiplied by the number of services supplied per week to the premises.

Particulars of Waste Container	Annual service charge - per service per week
140L Commercial Waste Container (Kerbside)	$ 56.80
240L Commercial Waste Container (Kerbside)	$ 97.56
360L Commercial Waste Container (Kerbside)	$ 146.36

Appendix 1

6. Commercial waste container service charges (Wheelie Bin - Wheel out and Wheel back)

Part A – General service charge

The applicable Part A utility charge is the sum of the 'per service per week' amount specified in the below table multiplied by the number of services supplied per week to the premises.

Particulars of Waste Container	Annual service charge - per service per week
140L Commercial Waste Container (Wheel out and Wheel back)	$ 763.92
240L Commercial Waste Container (Wheel out and Wheel back)	$ 789.60
360L Commercial Waste Container (Wheel out and Wheel back)	$ 1,375.64

Part B – State Waste Levy cost component

The applicable Part B utility charge is the sum of the 'per service per week' amount specified in the below table multiplied by the number of services supplied per week to the premises.

Particulars of Waste Container	Annual service charge - per service per week
140L Commercial Waste Container (Wheel out and Wheel back)	$ 56.80
240L Commercial Waste Container (Wheel out and Wheel back)	$ 97.56
360L Commercial Waste Container (Wheel out and Wheel back)	$ 146.36

Appendix 1

7. Commercial premises - recyclable waste container service charges (Wheelie Bin)

Part A – General service charge

The applicable Part A utility charge is the sum of the 'per service per week' amount specified in the below table multiplied by the number of services supplied per week to the premises.

Particulars of Waste Container	Annual service charge - per service per week	Annual service charge – fortnightly service (F/N)
140L Commercial Recyclable Waste Container (Kerbside)	$ 170.12	$ 69.12
240L Commercial Recyclable Waste Container (Kerbside)	$ 171.88	$ 69.12
360L Commercial Recyclable Waste Container (Kerbside)	$ 459.72	$ 69.12

Part B – State Waste Levy cost component

The applicable Part B utility charge is the sum of the 'per service per week' amount specified in the below table multiplied by the number of services supplied per week to the premises.

Particulars of Waste Container	Annual service charge - per service per week	Annual service charge – fortnightly service (F/N)
140L Commercial Recyclable Waste Container (Kerbside)	Not applicable	Not applicable
240L Commercial Recyclable Waste Container (Kerbside)	Not applicable	Not applicable
360L Commercial Recyclable Waste Container (Kerbside)	Not applicable	Not applicable

Note: Part B is not applicable for item 7 recyclable waste containers because recyclable waste is disposed of at a resource recovery area, material recovery facility or other end of waste framework facility.

Appendix 1

8. Commercial premises - recyclable waste container service charges (Wheelie Bin - Wheel out Wheel back)

Part A – General service charge

The applicable Part A utility charge is the sum of the 'per service per week' amount specified in the below table multiplied by the number of services supplied per week to the premises.

Particulars of Waste Container	Annual service charge - per service per week	Annual service charge – fortnightly service (F/N)
140L Commercial Recyclable Waste Container (Wheel out and Wheel back)	$ 504.88	$ 253.44
240L Commercial Recyclable Waste Container (Wheel out and Wheel back)	$ 506.88	$ 253.44
360L Commercial Recyclable Waste Container (Wheel out and Wheel back)	$ 1,523.08	$ 761.44

Part B – State Waste Levy cost component

The applicable Part B utility charge is the sum of the 'per service per week' amount specified in the below table multiplied by the number of services supplied per week to the premises.

Particulars of Waste Container	Annual service charge - per service per week	Annual service charge – fortnightly service (F/N)
140L Commercial Recyclable Waste Container (Wheel out and Wheel back)	Not applicable	Not applicable
240L Commercial Recyclable Waste Container (Wheel out and Wheel back)	Not applicable	Not applicable
360L Commercial Recyclable Waste Container (Wheel out and Wheel back)	Not applicable	Not applicable

Note: Part B is not applicable for item 8 recyclable waste containers because recyclable waste is disposed of at a resource recovery area, material recovery facility or other end of waste framework facility.

Appendix 1

9. Bulk bin service charges for domestic waste (alone), commercial waste (alone) and commingled domestic waste and commercial waste

Part A – General service charge

The applicable Part A utility charge is the sum of the 'per service per week' amount specified in the below table multiplied by the number of services supplied per week to the premises.

Particulars of Waste Container	Annual service charge - per service per week
660L - Plastic	$ 1,746.32
750L - Galvanised	$ 1,757.04
1,000L - Galvanised	$ 1,950.48
1,100L - Plastic	$ 2,750.44
1,500L - Galvanised	$ 2,956.84
1,500L - Plastic	$ 3,270.60
2,000L - Galvanised	$ 3,751.28
2,250L - Galvanised	$ 4,170.40
3,000L - Galvanised	$ 5,426.72
4,500L - Galvanised	$ 6,992.80

Appendix 1

Part B – State waste levy cost component (domestic waste (alone) and commingled domestic waste and commercial waste) less an apportionment of the WRRA section 73DA and 73DB State annual payment

The applicable Part B utility charge is the sum of the 'per service per week' amount specified in the below table multiplied by the number of services supplied per week to the premises.

Particulars of Waste Container	Annual service charge - per service per week
660L - Plastic	$276.58 less apportionment = $0.00
750L - Galvanised	$314.30 less apportionment = $0.00
1,000L - Galvanised	$419.06 less apportionment = $0.00
1,100L - Plastic	$460.96 less apportionment = $0.00
1,500L - Galvanised	$628.60 less apportionment = $0.00
1,500L - Plastic	$628.60 less apportionment = $0.00
2,000L - Galvanised	$838.14 less apportionment = $0.00
2,250L - Galvanised	$942.92 less apportionment = $0.00
3,000L - Galvanised	$1,257.22 less apportionment = $0.00
4,500L – Galvanised	$1,885.86 less apportionment = $0.00

Appendix 1

Part B – State waste levy cost component commercial waste (alone)

The applicable Part B utility charge is the sum of the 'per service per week' amount specified in the below table multiplied by the number of services supplied per week to the premises.

Particulars of Waste Container	Annual service charge - per service per week
660L - Plastic	$ 268.32
750L - Galvanised	$ 305.08
1,000L - Galvanised	$ 406.72
1,100L - Plastic	$ 447.52
1,500L - Galvanised	$ 610.24
1,500L - Plastic	$ 610.24
2,000L - Galvanised	$ 813.68
2,250L - Galvanised	$ 915.36
3,000L - Galvanised	$ 1,220.60
4,500L - Galvanised	$ 1,831.04

Appendix 1

10. Compacted bulk bin service charges (bins not supplied by the Council of the City of Gold Coast) for domestic waste (alone), commercial waste (alone) and commingled domestic waste and commercial waste

Part A – General service charge

The applicable Part A utility charge is the sum of the 'per service per week' amount specified in the below table multiplied by the number of services supplied per week to the premises.

Particulars of Waste Container	Annual service charge - per service per week
1,500L - Size 3C	$ 8,557.24
3,000L - Size 6C	$ 16,445.72

Part B – State waste levy cost component (domestic waste (alone) and commingled domestic waste and commercial waste) less an apportionment of the WRRA section 73DA and 73DB State annual payment

The applicable Part B utility charge is the sum of the 'per service per week' amount specified in the below table multiplied by the number of services supplied per week to the premises.

Particulars of Waste Container	Annual service charge - per service per week
1,500L - Size 3C	$628.60 less apportionment = $0.00
3,000L - Size 6C	$1,257.22 less apportionment = $0.00

Part B – State waste levy cost component commercial waste (alone)

The applicable Part B utility charge is the sum of the 'per service per week' amount specified in the below table multiplied by the number of services supplied per week to the premises.

Particulars of Waste Container	Annual service charge - per service per week
1,500L - Size 3C	$ 610.24
3,000L - Size 6C	$ 1,220.60

Appendix 1

11. Roll-on-roll-off bulk bin service charges (bins not supplied by the Council of the City of Gold Coast) for domestic waste (alone), commercial waste (alone) and commingled domestic waste and commercial waste

Part A – General service charge

The applicable Part A utility charge is the sum of the 'per service per week' amount specified in the below table multiplied by the number of services supplied per week to the premises.

Particulars of Waste Container	Annual service charge - per service per week
Not exceeding 6m³	$ 25,841.28
Above 6m³ but not exceeding 10m³	$ 36,358.28
Above 10m³ but not exceeding 15m³	$ 40,166.60
Above 15m³ but not exceeding 20m³	$ 44,529.68
Above 20m³ but not exceeding 23m³	$ 46,838.80
Above 23m³ but not exceeding 34m³	$ 55,817.04

Appendix 1

Part B – State waste levy cost component (domestic waste (alone) and commingled domestic waste and commercial waste) less an apportionment of the WRRA section 73DA and 73DB State annual payment

The applicable Part B utility charge is the sum of the 'per service per week' amount specified in the below table multiplied by the number of services supplied per week to the premises.

Particulars of Waste Container	Annual service charge - per service per week
Not exceeding 6m³	$4,796.12 less apportionment = $0.00
Above 6m³ but not exceeding 10m³	$7,993.54 less apportionment = $0.00
Above 10m³ but not exceeding 15m³	$11,990.32 less apportionment = $0.00
Above 15m³ but not exceeding 20m³	$15,987.10 less apportionment = $0.00
Above 20m³ but not exceeding 23m³	$18,385.18 less apportionment = $0.00
Above 23m³ but not exceeding 34m³	$27,178.10 less apportionment = $0.00

Part B – State waste levy cost component commercial waste (alone)

The applicable Part B utility charge is the sum of the 'per service per week' amount specified in the below table multiplied by the number of services supplied per week to the premises.

Particulars of Waste Container	Annual service charge - per service per week
Not exceeding 6m³	$ 4,551.20
Above 6m³ but not exceeding 10m³	$ 7,585.36
Above 10m³ but not exceeding 15m³	$ 11,378.16
Above 15m³ but not exceeding 20m³	$ 15,171.00
Above 20m³ but not exceeding 23m³	$ 17,446.60
Above 23m³ but not exceeding 34m³	$ 25,790.64

Appendix 1

12. **Compacted roll-on-roll-off bulk bin service charges (bins not supplied by the Council of the City of Gold Coast) for domestic waste (alone), commercial waste (alone) and commingled domestic waste and commercial waste**

Part A – General service charge

The applicable Part A utility charge is the sum of the 'per service per week' amount specified in the below table multiplied by the number of services supplied per week to the premises.

Particulars of Waste Container	Annual service charge - per service per week
Not exceeding 10m³	$ 60,215.08
Above 10m³ but not exceeding 15m³	$ 78,624.32
Above 15m³ but not exceeding 20m³	$ 97,046.92
Above 20m³ but not exceeding 23m³	$ 108,101.80
Above 23m³ but not exceeding 30m³	$ 134,422.32

Appendix 1

Part B – State waste levy cost component (domestic waste (alone) and commingled domestic waste and commercial waste) less an apportionment of the WRRA section 73DA and 73DB State annual payment

The applicable Part B utility charge is the sum of the 'per service per week' amount specified in the below table multiplied by the number of services supplied per week to the premises.

Particulars of Waste Container	Annual service charge - per service per week
Not exceeding 10m³	$15,987.10 less apportionment = $0.00
Above 10m³ but not exceeding 15m³	$23,980.66 less apportionment = $0.00
Above 15m³ but not exceeding 20m³	$31,974.22 less apportionment = $0.00
Above 20m³ but not exceeding 23m³	$36,770.38 less apportionment = $0.00
Above 23m³ but not exceeding 30m³	$47,961.36 less apportionment = $0.00

Part B – State waste levy cost component commercial waste (alone)

The applicable Part B utility charge is the sum of the 'per service per week' amount specified in the below table multiplied by the number of services supplied per week to the premises.

Particulars of Waste Container	Annual service charge - per service per week
Not exceeding 10m³	$ 15,249.00
Above 10m³ but not exceeding 15m³	$ 22,873.36
Above 15m³ but not exceeding 20m³	$ 30,498.00
Above 20m³ but not exceeding 23m³	$ 35,072.60
Above 23m³ but not exceeding 30m³	$ 45,747.00

Appendix 1

13. Recyclable waste bulk bin service charges

Part A – General service charge

The applicable Part A utility charge is the sum of the 'per service per week' amount specified in the below table multiplied by the number of services supplied per week to the premises.

Particulars of Waste Container	Annual service charge - per service per week
660L - Plastic	$ 873.68
750L - Galvanised	$ 731.72
1,000L - Galvanised	$ 735.52
1,100L - Plastic	$ 1,571.20
1,500L – Galvanised	$ 1,320.04
1,500L – Plastic	$ 1,280.68
2,000L – Galvanised	$ 1,324.04
2,250L – Galvanised	$ 1,836.44
3,000L – Galvanised	$ 1,839.00
4,000L – Galvanised	$ 2,206.68
4,500L – Galvanised	$ 2,358.32

Appendix 1

Part B – State Waste Levy cost component

The applicable Part B utility charge is the sum of the 'per service per week' amount specified in the below table multiplied by the number of services supplied per week to the premises.

Particulars of Waste Container	Annual service charge - per service per week
660L – Plastic	Not applicable
750L – Galvanised	Not applicable
1,000L – Galvanised	Not applicable
1,100L – Plastic	Not applicable
1,500L – Galvanised	Not applicable
1,500L – Plastic	Not applicable
2,000L – Galvanised	Not applicable
2,250L – Galvanised	Not applicable
3,000L – Galvanised	Not applicable
4,000L – Galvanised	Not applicable
4,500L – Galvanised	Not applicable

Note: Part B is not applicable for item 13 recyclable waste containers because recyclable waste is disposed of at a resource recovery area, material recovery facility or other end of waste framework facility.

Appendix 1

14. Recyclable waste roll-on-roll-off bulk bin service charge (bins not supplied by the Council of the city of Gold Coast

Part A – General service charge

The applicable Part A utility charge is the sum of the 'per service per week' amount specified in the below table multiplied by the number of services supplied per week to the premises.

Particulars of Waste Container	Annual service charge - per service per week
Not exceeding 6m³	$ 13,935.40
Not exceeding 23m³	$ 53,714.04

Part B – State Waste Levy cost component

The applicable Part B utility charge is the sum of the 'per service per week' amount specified in the below table multiplied by the number of services supplied per week to the premises.

Particulars of Waste Container	Annual service charge - per service per week
Not exceeding 6m³	Not applicable
Not exceeding 23m³	Not applicable

Note: Part B is not applicable for item 14 recyclable waste containers because recyclable waste is disposed of at a resource recovery area, material recovery facility or other end of waste framework facility.

15. Green organics roll-on-roll-off bulk bin service charge

Part A – General service charge

The applicable Part A utility charge is the sum of the 'per service per week' amount specified in the below table multiplied by the number of services supplied per week to the premises.

Roll-on-roll-off container	Annual service charge - per service per week
Not exceeding 15m³	$ 31,289.88

Part B – State Waste Levy cost component

The applicable Part B utility charge is the sum of the 'per service per week' amount specified in the below table multiplied by the number of services supplied per week to the premises.

Roll-on-roll-off container	Annual service charge - per service per week
Not exceeding 15m³	Not applicable

Note: Part B is not applicable for item 15 green organics containers because green organics is disposed of at a resource recovery area, material recovery facility or other end of waste framework facility.

Appendix 1

16. **Commercial food waste bin service charges**

Part A – General service charge

Particulars of Waste Container	Annual service charge - number of services per week	
	2	3
140L Food waste wheelie bin	$ 411.60	$ 617.40
240L Food waste wheelie bin	$ 705.60	$ 1,058.40
660L Food waste bulk bin	$ 2,367.36	$ 3,551.04

Part B – State Waste Levy cost component

Particulars of Waste Container	Annual service charge - number of services per week	
	2	3
140L Food waste wheelie bin	Not applicable	Not applicable
240L Food waste wheelie bin	Not applicable	Not applicable
660L Food waste bulk bin	Not applicable	Not applicable

If a commercial, industrial or domestic bulk refuse/waste service is made available to premises by Council but is not utilised by the owner/occupier of the premises, a utility charge from this Appendix 1, items 1 to 16 above, will be levied by Council by reference to the size of receptacle and number of services Council determines to be appropriate having regard to the nature and volume of refuse/waste being produced at the premises.

Appendix 1

17. **Notes and explanatory comments**

(a) In this Appendix 1, a "base domestic collection service" comprises the supply and servicing of, collectively:-

i a 140 litre waste container or a 240 litre waste container for the collection of domestic waste from domestic premises serviced weekly; and

ii a 140 litre waste container or a 240 litre waste container for the collection of recyclable waste (other than green organics) from domestic premises serviced fortnightly.

The utility charge for a base domestic collection service is composed of the following parts:-

iii (Part A) combined domestic waste and recyclable waste utility charge; plus

iv (Part B) the State waste levy cost component representing an apportionment of the waste levy payable to the State by Council, in its capacity as the operator of levyable waste disposal sites in Council's local government area, to the State LESS an apportionment of the *Waste Reduction and Recycling Act 2011* section 73DA State annual payment for the financial year 2025-26 received, or to be received from the State, applicable to domestic premises receiving a base domestic collection service.

(b) The higher utility charges specified in this Appendix 1 (not the utility charge for a base domestic collection service specified in item 17(a)) apply if:-

i the premises are commercial premises; or

ii for domestic premises, the number of waste collection services supplied to the domestic premises is greater than:-

(A) one domestic waste collection service weekly; or

(B) one recyclable waste collection service fortnightly; or

iii the number of waste containers supplied to, and serviced at, the premises is greater than:-

(A) one 140 or 240 litre waste container for the collection of general waste; and

(B) one 140 or 240 litre waste container for the collection of recyclable waste; or

iv the capacity of the waste containers supplied to, and serviced at, the premises is other than:-

(A) one 140 or 240 litre waste container for the collection of general waste; and

(B) one 140 or 240 litre waste container for the collection of recyclable waste; or

v the premises receive a green organics collection service.

(c) Premises will be charged for a base domestic collection service if the premises are domestic premises situated in an area which Council has designated as an area in which Council may conduct general waste or green organics collection unless:-

i the domestic premises form part of a community titles scheme; or

ii the domestic premises are situated on South Stradbroke Island; or

iii item 17(b) applies to the domestic premises.

(d) Domestic premises on South Stradbroke Island:-

i will be charged for a base domestic collection service; and

ii will receive a base domestic collection service; and

iii will only receive a base domestic collection service if the domestic premises are in an area which Council has designated as an area in which Council may conduct general waste or recyclable waste collection (other than domestic premises which form part of a community titles scheme).

(e) If domestic premises are situated in an area which Council has designated as an area in which Council may conduct general waste or green organics collection and the domestic premises form part of a community titles scheme then:-

i if item 17(b) does not apply to the domestic premises — the waste management utility charge for the domestic premises is the utility charge for a base domestic collection service specified in item 17(a);

ii if item 17(b) applies to the domestic premises — the waste management utility charge for the domestic premises will be the higher utility charge calculated in accordance with this Appendix 1, not the utility charge for a base domestic collection service specified in item 17(a).

(f) The utility charges specified in this Appendix 1 apply if a waste collection service comprised of the collection of commercial waste or recyclable waste is provided for commercial premises situated in an area which Council has designated as an area in which Council may conduct general waste or green organics collection.

(g) Where a collection service for domestic waste and recyclable waste is made available for one or more domestic premises which form part of a community titles scheme and item 17(b) applies to the domestic premises, the waste management utility charge levied in respect of each domestic premises comprising the scheme will be the greater of:-

i the utility charge for a base domestic collection service specified in item 17(a); and

ii a sum proportionate to the ratio of the contribution schedule lot entitlement for each lot to the aggregate contribution schedule lot entitlements for the scheme multiplied by the applicable higher utility charges calculated in accordance with this Appendix 1 for domestic waste.

(h) Where a collection service for commercial waste and recyclable waste is made available for one or more commercial premises which form part of a community titles scheme, the waste management utility charge levied in respect of each commercial premises comprising the scheme will be the greater of:-

i the utility charge calculated in accordance with Appendix 1 for the collection services that apply to the commercial premises; and

ii a sum proportionate to the ratio of the contribution schedule lot entitlement for each lot in the community titles scheme to the aggregate contribution schedule lot entitlements for the scheme multiplied by the applicable higher utility charges calculated in

accordance with this Appendix 1 for the scheme,

but in any event, the utility charge for each commercial premises cannot be less than the utility charge for a base domestic collection service specified in item 17(a).

(i) Where a community titles scheme comprises both domestic premises and commercial premises and a collection service for domestic waste and/or commercial waste and recyclable waste is made available for one or more of the premises which form part of the scheme and item 17(b) applies to the premises then:-

i if the individual premises and (if applicable) the common property are each serviced with separate waste containers, such that the domestic waste, commercial waste and recyclable waste are not commingled, the waste management utility charge levied in respect of each lot comprising the scheme will be:-

(A) for domestic lots, a utility charge calculated in accordance with item 17(e)(i) and (ii); and

(B) for commercial lots, a higher utility charge calculated in accordance with this Appendix 1 for the collection service being supplied to the premises; and

(C) for common property, a higher utility charge calculated in accordance with this Appendix 1 for the collection service being supplied to the common property.

ii If the domestic lots, the commercial lots and (if applicable) the common property are serviced with shared waste containers (for example, a bulk bin), thus commingling the domestic waste and the commercial waste, the waste management utility charge levied in respect of each lot in the scheme will be the greater of:-

(A) the utility charge for a base domestic collection service specified in item 17(a); and

(B) a sum proportionate to the ratio of the contribution schedule lot entitlement for each lot in the community titles scheme to the aggregate contribution schedule lot entitlement multiplied by the applicable higher utility charges calculated in accordance with this Appendix 1 as if the scheme were a community titles scheme comprised of domestic premises.

(j) A utility charge equal to 50% of the utility charge for a base domestic collection service specified in item 17(a) will apply to domestic premises if the domestic premises:-

i form part of a community titles scheme; and

ii are used for aged care or nursing home purposes; and

iii have an area less than 61m^2.

(k) An 80 litre non-wheeled waste container will only be supplied and serviced for domestic premises if the supply and servicing of a wheeled waste container at the domestic premises is not practical.

(l) A waste management utility charge will not be levied on premises if the premises comprise a lot in a community titles scheme and the

lot is set aside, and used, exclusively, for storage or garage purposes.

(m) A waste management utility charge will not be levied for the servicing of waste containers set aside for the collection of recyclable waste at a school if Council levies a waste management utility charge for the servicing of waste containers which are set aside for the collection of commercial waste at the school.

(n) For all community titles schemes, optional charges for the cleaning of bulk bins used for the collection of commercial waste or domestic waste will be charged direct to the body corporate for the community titles scheme.

(o) For the application of item 2 in this Appendix 1, where a property requires an additional optional set of waste containers (a 140, 240 or 360 L waste container for the collection of domestic waste and a 140, 240 or 360 L waste container for the collection of recyclable waste) will be considered a "Set" and each set will be subject to a base domestic collection service utility charge as specified in item 1 per relevant set, per annum, rather than the charge as specified in item 2 for each waste container.

(p) Collection Services on a Sunday are only available at the approval of the Coordinator Waste Collection services.

18. **Changes in waste services**

(a) Where the owner or occupier of commercial premises wishes to:-

i increase or decrease the number of waste containers for the storage and collection of commercial waste at the commercial premises or the number of commercial waste collection services supplied per week; or

ii vary the size or number of waste containers used for any type of service,

the owner or occupier, or the authorised agent of the owner or occupier, must apply to Council setting out the proposed variation.

(b) If Council agrees to a proposed variation, Council will advise the applicant of the varied waste management services calculated in accordance with this Appendix 1 and the Council resolution. Waste management utility charges for the waste management services as varied will apply from the date on which the variation takes effect.

(c) Council may vary the waste management services supplied to premises from time to time having regard to the nature and volume of general waste produced, or to be produced, as a result of the ordinary use or occupation of the premises.

(d) Council may vary the waste management services supplied to premises from time to time, and in particular:-

i the number of waste containers supplied to the premises; and

ii the size and type of each waste container supplied to the premises; and

iii how often Council will arrange for the collection of general waste from each waste container supplied to the premises.

(e) If Council varies the waste management services supplied to premises, Council must give written notice of the variation to each of the

owner and the occupier of the premises.

19. **Cancellation of waste services**

(a) Council may agree not to charge for waste management services supplied to premises at the request of the owner or occupier of the premises.

(b) To allow Council to consider such a request, the following requirements must first be met:-

i the premises to which the waste management services would be provided will be unoccupied for a period exceeding 3 months; and

ii the owner must complete a statutory declaration stating:-

(A) the reason the premises will be unoccupied;

(B) the period during which the premises will remain unoccupied and the date from which they will cease to be occupied; and

(C) a recommencement date for the supply of waste management services.

iii if Council agrees not to levy a waste management utility charge for waste management services after receipt of an application, the utility charges will cease to apply from the later of:-

(A) the date Council receives the statutory declaration; and

(B) the nominated commencement date for the non-occupancy period.

(c) Utility charges for waste management services will cease to apply where Council receives advice that premises have been:-

i demolished; or

ii rendered uninhabitable by damage from fire or natural disaster.

(d) Utility charges will cease to apply from the later of the date Council receives advice in writing and the date on which the premises are demolished or rendered uninhabitable.

(e) A school may cancel the supply of waste management services temporarily during the December / January school holiday period.

(f) No waste management utility charges will apply from the later of:-

i the date Council receives written advice from a school that the school wishes to cancel waste management services; and

ii the cancellation date nominated by the school.

Appendix 1

20. **Green Organics services**

For those customers who request the service, green organics management services will be supplied for a minimum period of 12 months from the date of delivery of a waste container which is to be set aside for the storage and collection of green organics.

21. **Sustainability Bundle service**

(a) Service availability is restricted to the owners of domestic premises, who currently have a “base domestic collection service” as specified in item 17(a) using a 140L domestic waste container.

(b) The owners of domestic premises who take up the service will be restricted from acquiring additional domestic waste services for that domestic premise. This restriction does not apply to additional recyclable and green organics services.

22. **Commercial Food Waste services**

(a) Service availability is limited at this time.

(b) Access to this service will be assessed by Council on a case by case basis following submission of the appropriate application form.

(c) Council determines if compostable bin liners are required as part of the service based on the waste storage area of the premises.

(d) A minimum commercial food waste service charge period of 12 months will apply.

(e) The commercial food waste service charges detailed in item 16 in this Appendix 1 are offered as part of a trial project. These charges may be subject to significant change in future years once the trial has complete.

23. **Determination about levying Waste Management Utility Charges**

(a) If premises are in an area designated by Council as an area in which Council will conduct general waste or green organics collection, Council may levy waste management utility charges in accordance with this Appendix 1 having regard to:-

i the nature and volume of general waste produced, or to be produced, as a result of the ordinary use or occupation of the premises; and

ii the number of standard general waste containers supplied to the premises; and

iii the size and type of each standard general waste container supplied to the premises; and

iv the nature of the general waste stored, or to be stored, in each standard general waste container, for example, whether the

standard general waste container is set aside for the storage of:-

(A) commercial waste; or

(B) domestic waste; or

(C) recyclable waste (but excluding green organics); or

(D) recyclable waste (but limited to green organics); and

v how often Council will arrange for the collection of general waste from each standard general waste container supplied to the premises.

vi For clarity, in making a determination about the levying of waste management utility charges for premises, from time to time, Council is not obliged to have regard to:-the extent to which the owner or occupier of the premises elects to utilise, for the storage of general waste, 1 or more of the standard general waste containers supplied to the premises for, or on behalf of, Council; or

vii the extent to which the owner or occupier of the premises elects to utilise, for the storage of general waste, 1 or more containers, other than standard general waste containers supplied to the premises for, or on behalf of, Council.

(b) Council delegates, to the chief executive officer of Council, the power to make a determination about the levying of waste management utility charges for premises having regard to the criteria specified in each of item 23(a) and (b).

24. **Definitions**

In this Appendix 1, the following definitions apply.
